JOVI G. SARMIENTO

TECHNICAL WRITER | SAAS DOCUMENTATION SPECIALIST

Enterprise Software Documentation • Structured Authoring • Docs-as-Code

Abu Dhabi, United Arab Emirates | sarmiento.jovi@gmail.com | +971 58 526 8744
www.linkedin.com/in/jovi-sarmiento | Documentation Portfolio

PROFESSIONAL SUMMARY

Technical Writer with 15+ years of experience developing technical documentation for enterprise software, SaaS applications, and engineering systems. Skilled in translating complex requirements into clear, structured, user-focused documentation throughout the SDLC. Experienced in Agile/Scrum collaboration, information architecture, structured authoring, and documentation lifecycle management. Combines extensive experience in MadCap Flare and XML-based authoring with hands-on Docs-as-Code practice using Markdown, Git, GitHub, and MkDocs.

TECHNICAL SKILLS & TOOLS

- **Technical Documentation**: SRS, BRD, FDD, TDD, User Guides, System Administration Guides, Online Help, Release Notes, Technical Procedures
- **Structured Authoring & Content Management**: MadCap Flare, Oxygen XML Author, DITA/XML, Vasont, Confluence, SharePoint, Information Architecture, Content Reuse
- **Docs-as-Code & Development:** Markdown, MkDocs, Git, GitHub, GitHub Pages, Visual Studio Code, TFS/TFVC, HTML, XHTML, CSS, JavaScript
- **Documentation Practices:** Agile/Scrum, SDLC, Topic-Based Authoring, Documentation Standards, Technical Validation, AI-Assisted Documentation

PROFESSIONAL EXPERIENCE

TAQNIAT INTELLIGENT SOLUTIONS

Technical Writer | August 2022 – Present
Abu Dhabi, United Arab Emirates

- Develop and maintain technical documentation for enterprise software and IT infrastructure, including system administration guides, functional specifications, user manuals, and technical procedures.
- Collaborate with developers, infrastructure engineers, business analysts, and SMEs to gather requirements, validate technical content, and maintain documentation accuracy throughout the SDLC.
- Design and develop a centralized documentation portal using MadCap Flare, incorporating team-specific projects, reusable templates, structured navigation, and consistent styling.
- Establish structured authoring and content integration workflows, including topic-based documentation, TOC management, cross-references, and standardized Word-to-Flare migration processes.
- Maintain documentation using TFS/TFVC and Visual Studio Code, applying AI-assisted tools to support content review, code troubleshooting, and documentation workflow improvements.

CLINKIT SOLUTIONS (SKYKOMISH, INC) | SHIJI PROJECT

Technical Writer | May 2021 – August 2022

- Developed and maintained technical documentation for cloud-based Point of Sale (POS) solutions, including software installation, configuration, and fiscal compliance requirements.
- Collaborated with clients, project managers, and technical stakeholders to develop Business Requirement Documents (BRDs), capturing business objectives, functional requirements, and solution constraints.

- Partnered with software development teams to prepare Functional Design Documents (FDDs) and Technical Design Documents (TDDs), describing system behavior, functionality, and implementation requirements.

WILLIS TOWERS WATSON

Technical Writer | October 2018 – May 2021

- Developed and maintained technical specifications, user documentation, and release communications for enterprise software products within Agile/Scrum development environments.
- Collaborated with product teams and SMEs to translate technical requirements and product changes into audience-focused documentation, contributing to documentation strategy and continuous improvement.

NOKIA TECHNOLOGY CENTER

Technical Content Developer | November 2016 – October 2018

- Developed and validated technical documentation for WCDMA Radio Network Controller (RNC) systems, including feature descriptions, activation procedures, and system documentation, in collaboration with engineering SMEs.
- Served as a key contact for Oxygen XML Author and Vasont, providing tool support, knowledge sharing, and training while coordinating feature documentation for product releases.

VERTIV CO. (FORMERLY EMERSON NETWORK POWER)

Engineer 1 – Technical Writing | December 2014 – November 2016

- Converted and maintained technical service documentation using XHTML, CSS, and JavaScript for the Technical Knowledge Online (TKO) platform, including service manuals, technical articles, and troubleshooting documentation.
- Coordinated technical reviews and approvals with product specialists, published documentation updates to the production knowledge platform, and validated published content for accuracy and consistency.

SELECTED DOCUMENTATION PROJECTS

TECHNICAL DOCUMENTATION PORTFOLIO | DOCS-AS-CODE

Independent Portfolio Project

- Developed and published a technical documentation portfolio using Markdown, MkDocs, GitHub, and GitHub Pages, demonstrating source-controlled documentation authoring and web-based documentation publishing.
- Organized documentation into structured, responsive project pages with downloadable resources, using Visual Studio Code and Git-based workflows to manage content revisions and publication updates.

CARDFLOW – CREDIT CARD ORIGINATION & APPROVAL SAAS PLATFORM

Independent Documentation Case Study

- Developed an end-to-end documentation case study for a simulated multi-tenant SaaS platform supporting credit card application, amendment, reinstatement, review, and approval workflows.
- Authored interconnected BRD, SRS, FDD, User Stories, Acceptance Criteria, and User Guide documentation, covering business rules, validation requirements, workflow transitions, role-based interactions, and exception handling.

EDUCATION & PROFESSIONAL QUALIFICATIONS

BACHELOR OF SCIENCE IN ELECTRONICS ENGINEERING

Bulacan State University | Malolos, Bulacan, Philippines | 2009

REGISTERED ELECTRONICS ENGINEER (RECE)

Professional Regulation Commission (PRC), Philippines
