Version History

Rev #	System Version	Description	Author	Date	Reviewer	Date
1.0		Initial document publication	J. Sarmiento	30/5/2026		

1. Introduction

This section provides users with a brief overview of the **CardFlow Credit Origination Platform**, the purpose of the guide, the intended audience, and the primary user roles involved in the credit origination workflow.

1.1.Purpose of the Guide

The **User Guide** provides instructions for using the **CardFlow Credit Origination Platform** to create, review, approve, and track credit-related requests. It helps users understand the platform's features, navigate the user interface, and perform workflow-related activities efficiently.

1.2.Product Overview

The **CardFlow Credit Origination Platform** is a multi-tenant SaaS solution designed to automate and manage the end-to-end credit origination lifecycle. The platform supports credit application, amendment, and reinstatement workflows through configurable business rules, validation services, approval routing, notifications, and audit tracking.

Users can submit requests, review supporting information, participate in approval workflows, monitor request status, and access workflow history through a centralized web-based interface.

1.3.Intended Audience

The guide is intended for users who interact with the platform as part of the credit origination process, including applicants, tenant users, reviewers, and approvers.

The document serves as a reference for performing day-to-day operational activities, understanding workflow progression, and managing requests throughout their lifecycle.

1.4.User Roles

The platform supports multiple user roles, each with specific responsibilities and permissions in the credit origination process.

- **Applicant**
    - Creates and submits credit-related requests
    - Provides supporting information and documents

- Responds to returned requests and monitor application status throughout the workflow lifecycle.

Tenant User

- Manages credit requests on behalf of their organization
- Creates, updates, submits, and tracks applications, amendments, and reinstatement requests while coordinating with reviewers and approvers

- **Reviewer**
  - Assesses submitted requests
  - Validates supporting information and documentation
  - Provides review comments, and either return requests for correction or forward them for approval
- **Approver**
  - Evaluates reviewed requests and make final workflow decisions
  - Depending on assigned permissions, approvers approve, reject, or return requests for additional information

2. Getting Started

This section introduces the basic steps required to access and navigate the **CardFlow Credit Origination Platform**. It familiarizes users with login procedures, password recovery options, and the key interface components used throughout the platform.

2.1.System Access

Access to the platform is provided through a supported web browser and a valid user account. Depending on assigned permissions, users may access applicant, tenant user, reviewer, or approver functions in the platform.

Before accessing the system, users should ensure that:

- A valid user account has been created.
- Login credentials have been provided.
- A supported web browser is available.
- Network connectivity to the platform is established.

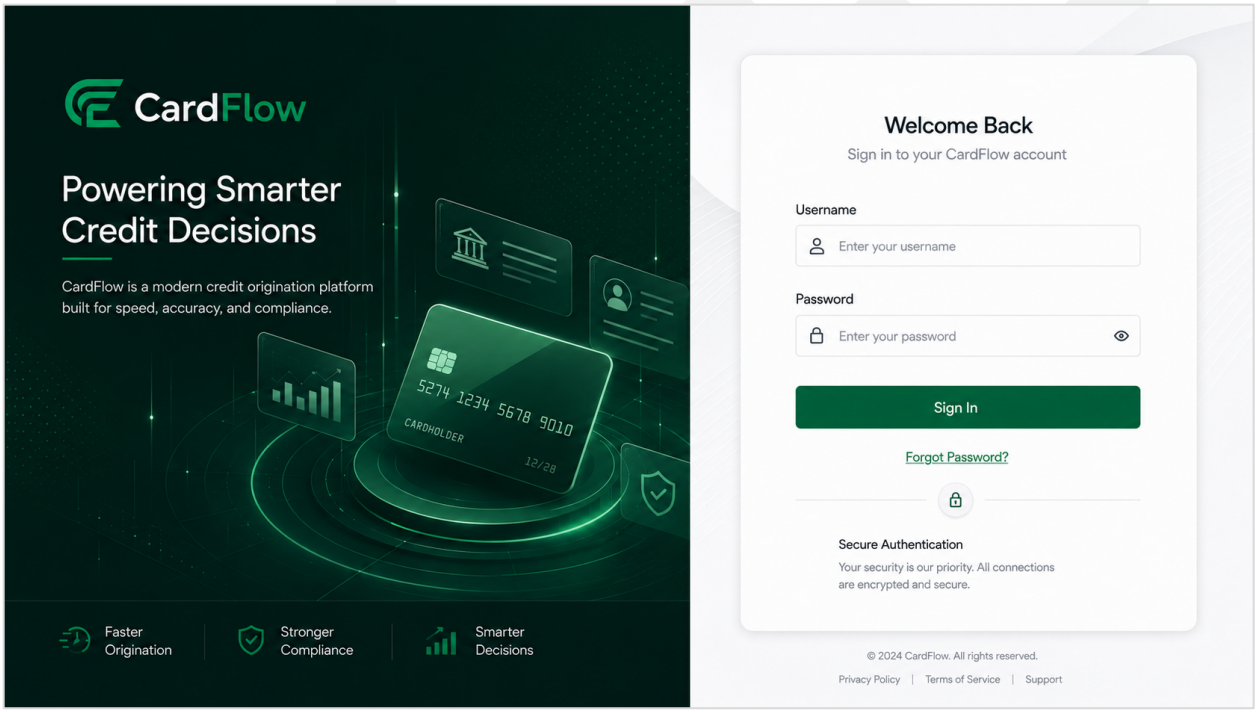

Figure 1 Login Page

2.2.Logging In

Users must authenticate using their assigned credentials before accessing platform features.

To log in:

1. Open the **CardFlow Credit Origination Platform** URL.
2. Enter your username or email address.
3. Enter your password.
4. Click **Sign In**.

Result: Upon successful authentication, the system displays the appropriate dashboard based on your assigned role.

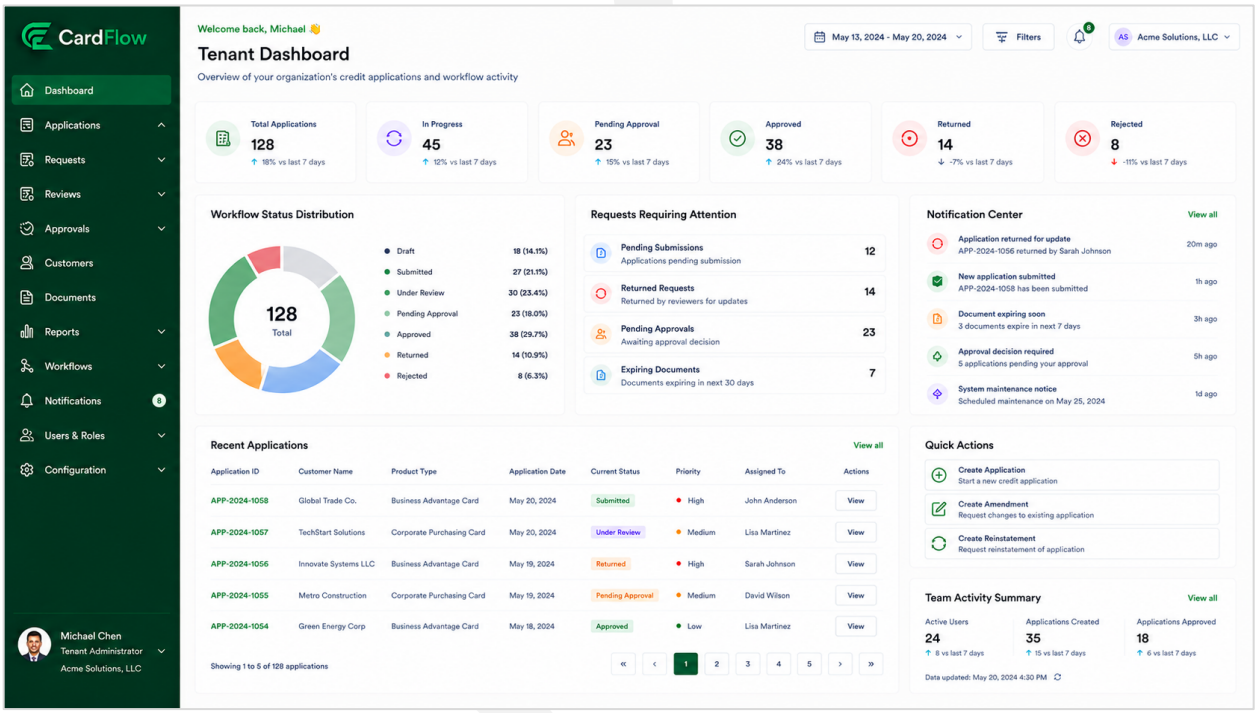

Figure 2 Tenant Dashboard

2.3.Resetting Password

Users who are unable to access their accounts due to a forgotten password can initiate the password reset process from the login page.

To reset your password:

1. Click **Forgot Password**.
2. Enter your registered email address.
3. Follow the instructions provided by the system.

4. Create a new password when prompted.
5. Log in using the updated credentials.

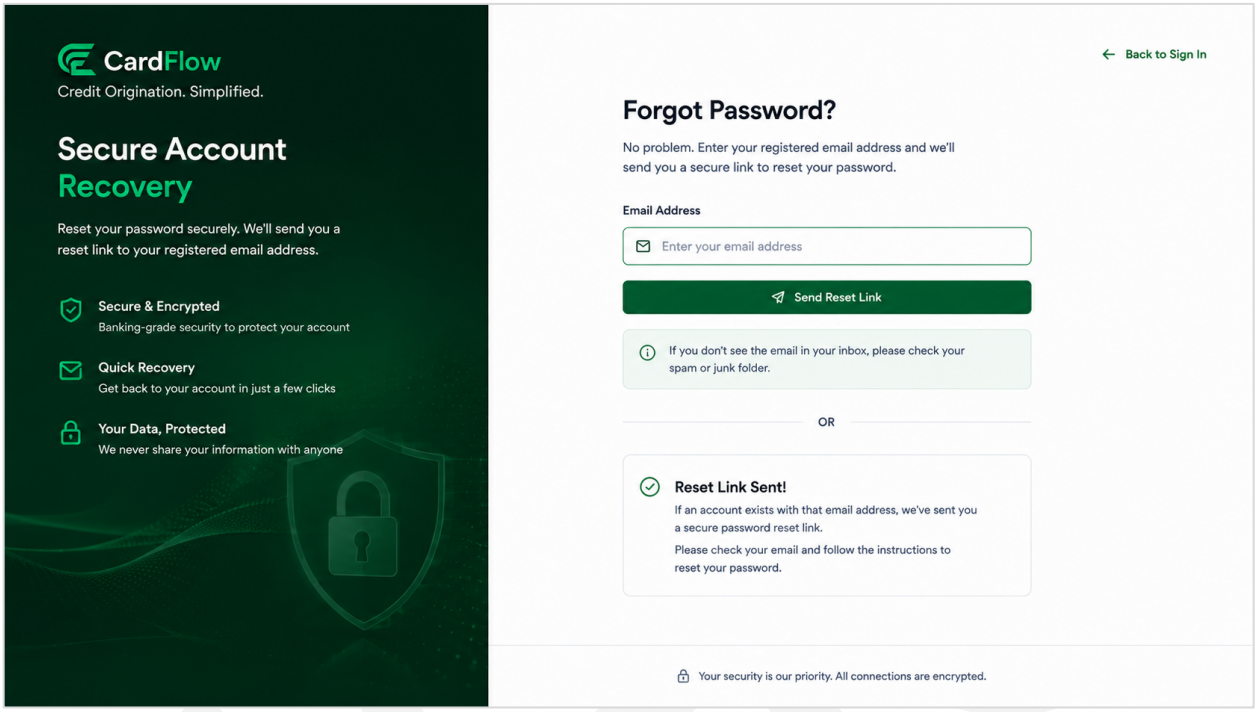

Figure 3 Password Reset Page

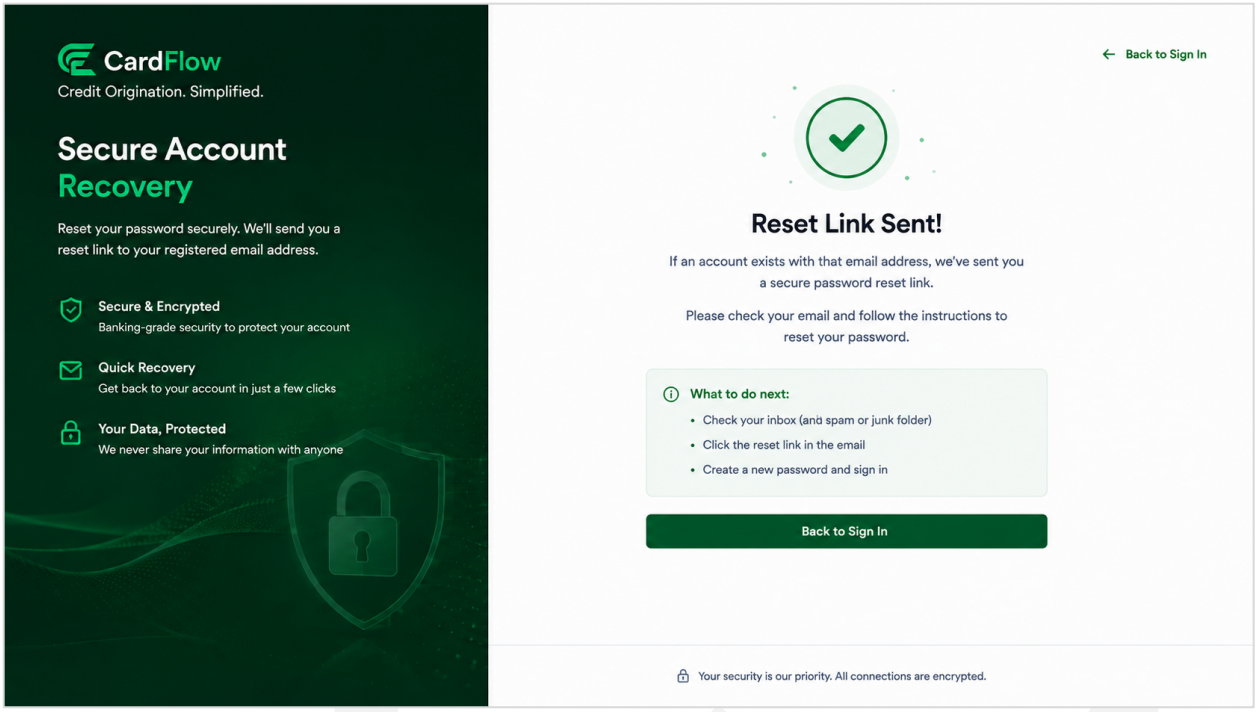

Figure 4 Password Reset Confirmation

2.4.Navigating the Application

The platform uses a role-based interface designed to provide quick access to workflow activities, request management functions, notifications, and reporting features.

Navigation options may vary depending on the user's assigned role and permissions.

2.5.Understanding Menus and Dashboards

The dashboard provides a centralized view of workflow activities, assigned tasks, request status information, notifications, and operational metrics.

Depending on user role, dashboard content may include:

- Pending requests
- Assigned reviews
- Pending approvals
- Workflow status summaries
- Notifications
- Recent activities

- Quick access actions

The navigation menu provides access to the platform's primary functional areas, allowing users to create, review, track, and manage requests throughout the credit origination lifecycle.

3. Dashboard Overview

The **Dashboard** serves as the primary workspace in the **CardFlow Credit Origination Platform**, providing users with visibility into application activity, workflow status, pending actions, notifications, and operational metrics. Dashboard content may vary based on assigned user roles and permissions.

3.1.Dashboard Components

The dashboard is organized into several functional areas that provide quick access to workflow information and commonly used actions.

Key dashboard components include:

- **Navigation Menu**
- **User and Tenant Information**
- **Dashboard Filters**
- **Request Status Summary Cards**
- **Workflow Status Distribution**
- **Requests Requiring Attention**
- **Notification Center**
- **Recent Applications**
- **Quick Actions**
- **Team Activity Summary**

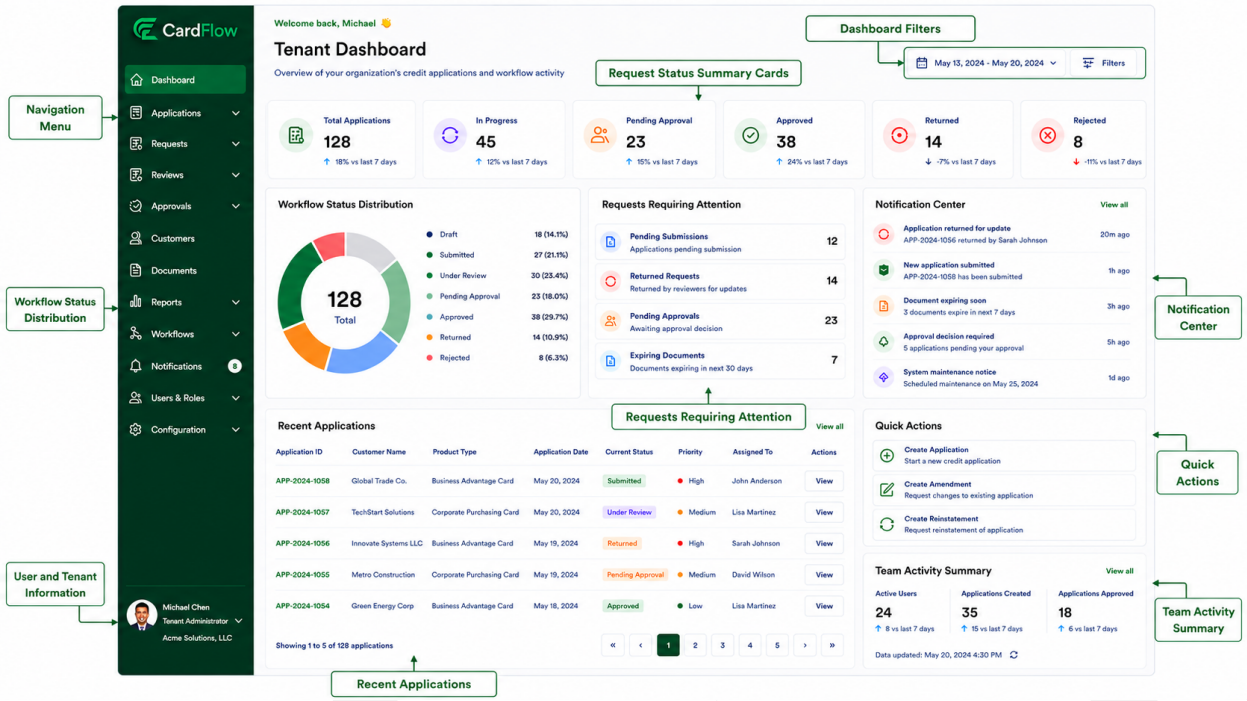

Figure 5 Tenant Dashboard (Annotated)

3.2.Navigation Menu

Located on the left side of the screen and provides access to the platform's primary functional areas.

Table 1 Navigation Menu

Navigation Menu	Description
Dashboard	Provides an overview of application activity, workflow status, notifications, and pending actions.
Applications	Allows users to create, view, and manage credit applications throughout their lifecycle.
Requests	Displays submitted application, amendment, and reinstatement requests for tracking and processing.
Reviews	Provides access to requests awaiting validation, assessment, or review activities.

Navigation Menu	Description
Approvals	Displays requests requiring approval decisions and approval workflow actions.
Customers	Maintains customer information associated with credit applications and requests.
Documents	Stores and manages supporting documents uploaded as part of workflow requests.
Reports	Provides access to operational reports, workflow metrics, and application statistics.
Workflows	Displays workflow definitions, request progress, and status tracking information.
Notifications	Displays workflow-generated alerts, reminders, and system notifications.
Users & Roles	Manages user accounts, role assignments, and access permissions.
Configuration	Maintains tenant-specific settings, workflow rules, approval matrices, and system parameters.

3.3.User and Tenant Information

User and Tenant Information displays:

- Logged-in user information
- Tenant/organization name
- User profile access

3.4.Dashboard Filters

Filters are used to adjust the displayed metrics and reporting period.

Provides:

- Date range selection

- Dashboard filtering options

3.5.Request Status Summary Cards

Request Status Summary Cards allows users to quickly assess overall workflow activity, and provides high-level workflow metrics:

- **Total Applications**
- **In Progress**
- **Pending Approval**
- **Approved**
- **Returned**
- **Rejected**

3.6.Workflow Status Distribution

Workflow Status Distribution provides visibility into workflow progression and workload distribution. This dashboard component displays:

- Visual breakdown of requests by status
- Percentage distribution
- Overall request volume

3.7.Requests Requiring Attention

Requests Requiring Attention helps users prioritize pending work and highlights items requiring action:

- **Pending Submissions**
- **Returned Requests**
- **Pending Approvals**
- **Expiring Documents**

3.8.Notification Center

Notification Center Provides visibility into recent platform activity, and displays workflow-generated alerts such as:

- Application submissions
- Returned requests
- Approval requests
- Document expiration notices
- System announcements

3.9.Recent Applications

Recent Applications allows users to quickly access active requests. It displays a list of recently created or updated applications, including:

- **Application ID**
- **Customer Name**
- **Product Type**
- **Application Date**
- **Current Status**
- **Priority**
- **Assigned User**

3.10. Quick Actions

Quick Actions allows users to initiate common workflow activities, and provides shortcuts to frequently used functions:

- **Create Application**
- **Create Amendment**
- **Create Reinstatement**

3.11. Team Activity Summary

Team Activity Summary provides a summary of organizational activity. It displays operational metrics such as:

- **Active Users**
- **Applications Created**
- **Applications Approved**

4. Credit Application Processing

Credit Application Processing describes the steps required to create, complete, submit, and track credit applications in the **CardFlow Credit Origination Platform**. The workflow enables users to capture applicant information, provide supporting documentation, submit requests for review, and monitor application progress throughout the credit origination lifecycle.

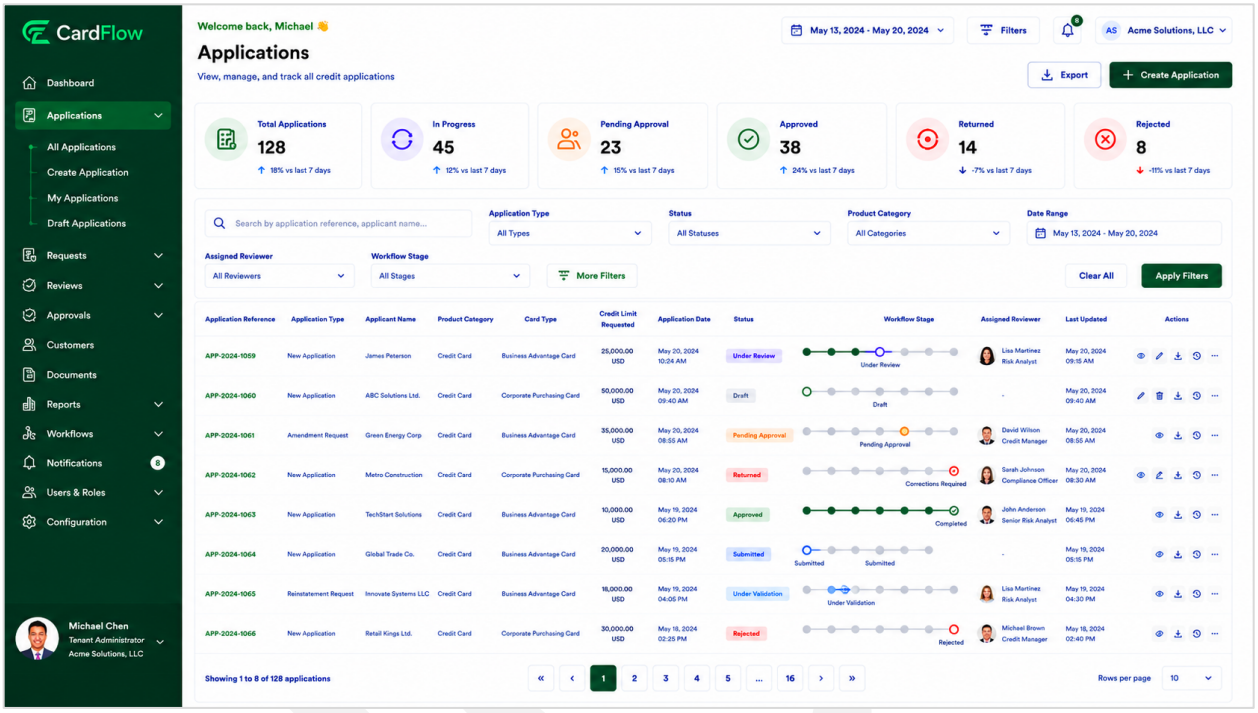

Figure 6 Credit Application Processing – Applications Screen

4.1.Creating a New Credit Application

Users can create a new credit application from the dashboard or **Applications** screen.

To create a new credit application:

1. Navigate to **Applications**.
2. Click **Create Application**.
3. Select the desired application type, if applicable.
4. Enter the required applicant information.
5. Complete the application details.
6. Save the application as a draft or proceed with submission.

Result: The system creates a new application record and assigns a unique application reference number.

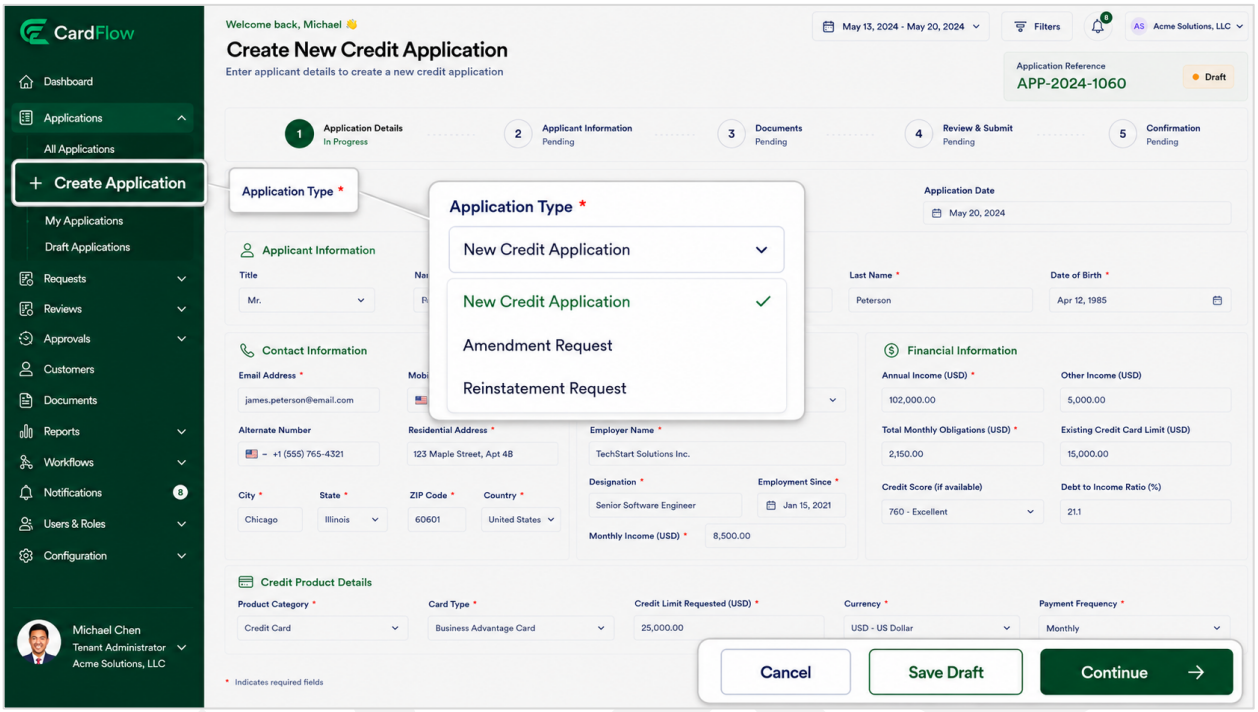

Figure 7 Creating New Credit Application

4.2.Completing Applicant Information

Applicant information must be provided before an application can be submitted for review.

Note: Required fields (*****) are validated by the system during data entry and submission.

Table 2 Applicant Information

Section	Information
Application Details	Application Type * Application Date

Section	Information
Applicant Information	Title First Name * Middle Name Last Name * Date of Birth *
Contact Information	Email Address * Mobile Number * Alternate Number Residential Address * City * State * ZIP Code * Country *
Employment Details	Employment Type * Employer Name * Designation * Employment Since * Monthly Income * Annual Income * Other Income
Financial Information	Total Monthly Obligations * Existing Credit Card Limit Credit Score (if available) Debt-to-Income Ratio

Section	Information
Credit Product Details	Product Category * Card Type * Credit Limit Requested * Currency * Payment Frequency *

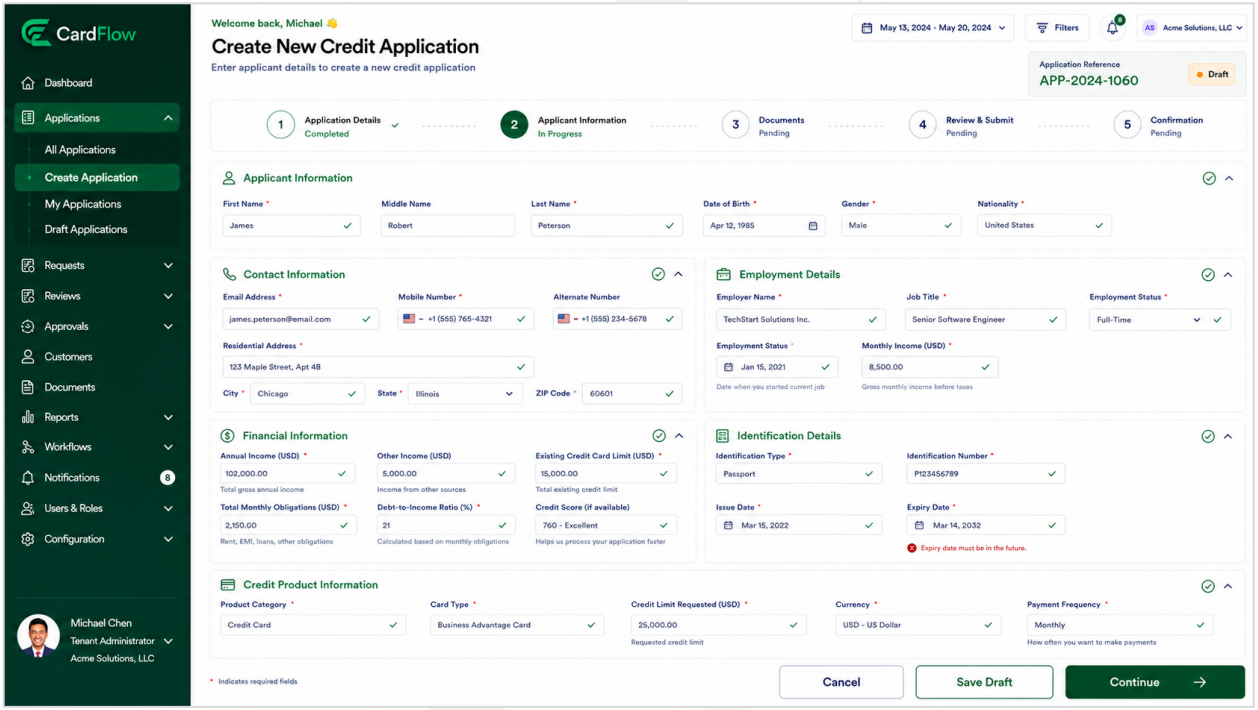

Figure 8 Completing Applicant Information – Inline Validations

4.3.Uploading Supporting Documents

Supporting documents may be required to validate applicant information and satisfy business or regulatory requirements.

To upload documents:

1. Open the application record.
2. Navigate to the **Documents** section.
3. Click **Upload Document**.

4. Select the appropriate document category.
5. Choose the file to upload.
6. Confirm the upload.

Result: Uploaded documents become associated with the application record and are available to reviewers and approvers.

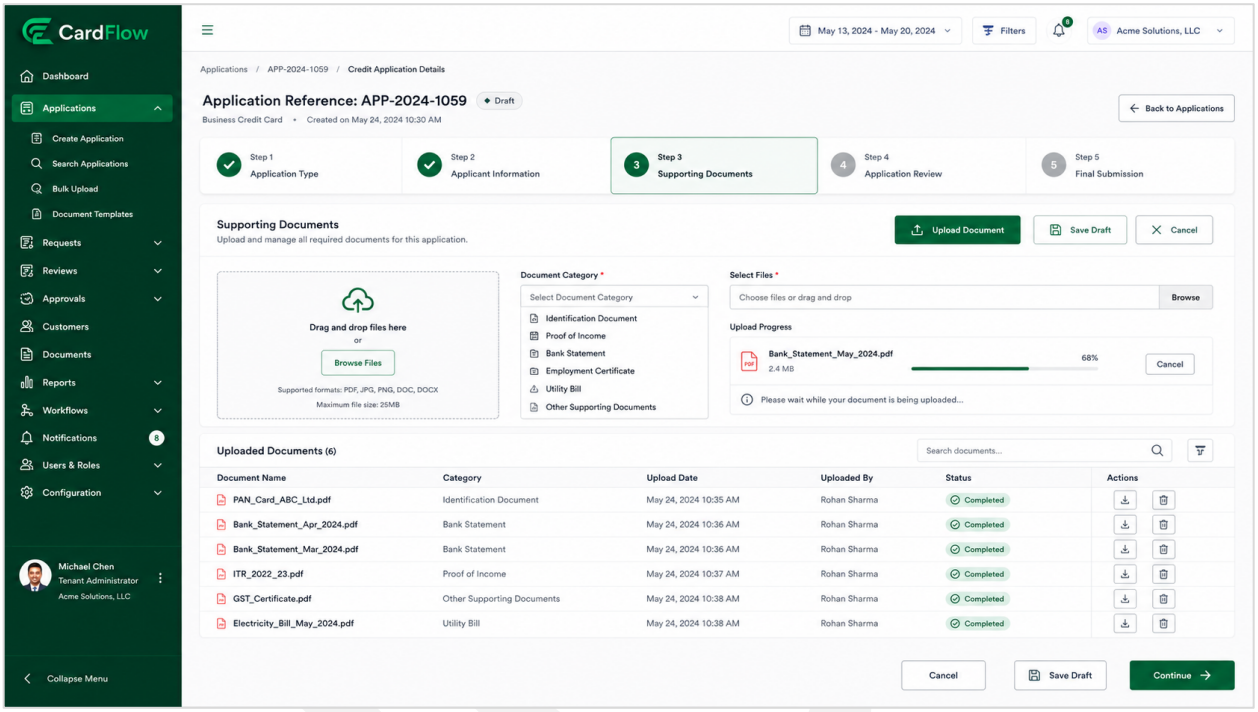

Figure 9 Uploading Supporting Documents

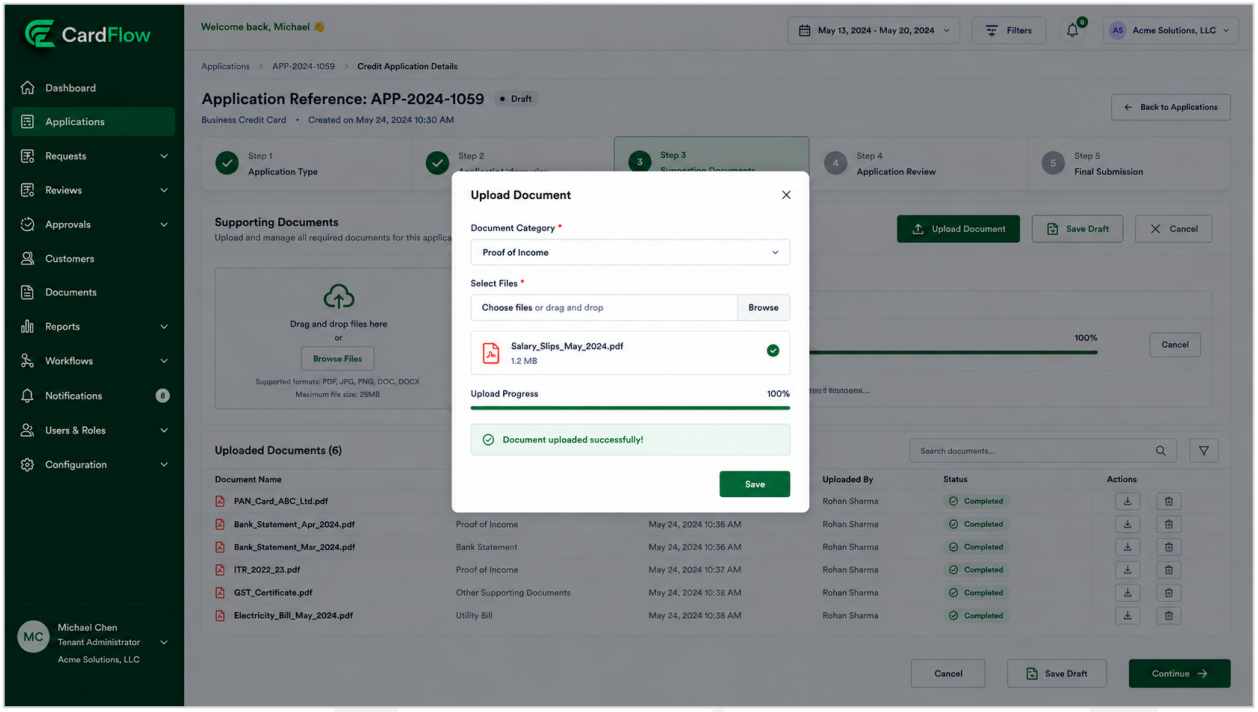

Figure 10 Uploading Supporting Documents – Upload Document Modal Window

4.4.Saving Draft Applications

Applications may be saved as drafts when additional information or documentation is required before submission.

To save an application as a draft:

1. Complete the available application details.
2. Click **Save Draft**.

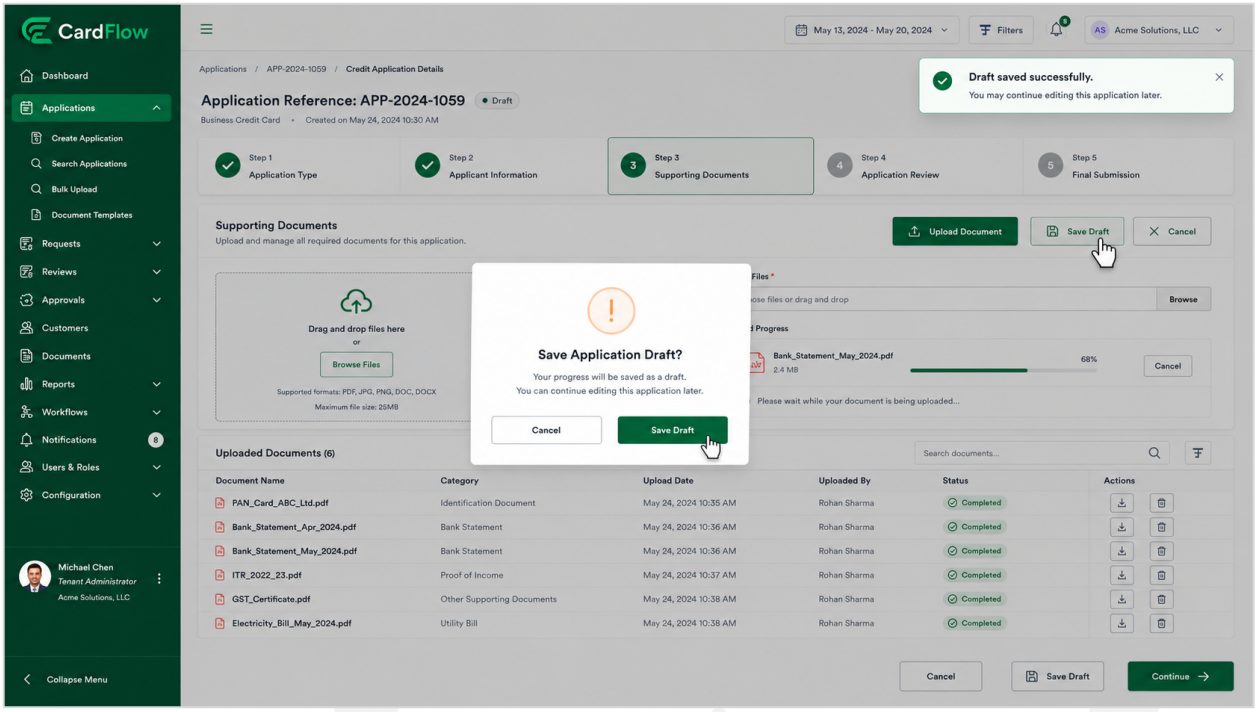

Figure 11 Saving Draft Application – Confirmation Message

3. Continue working on the application later.

Result: Draft applications remain editable until submitted for workflow processing.

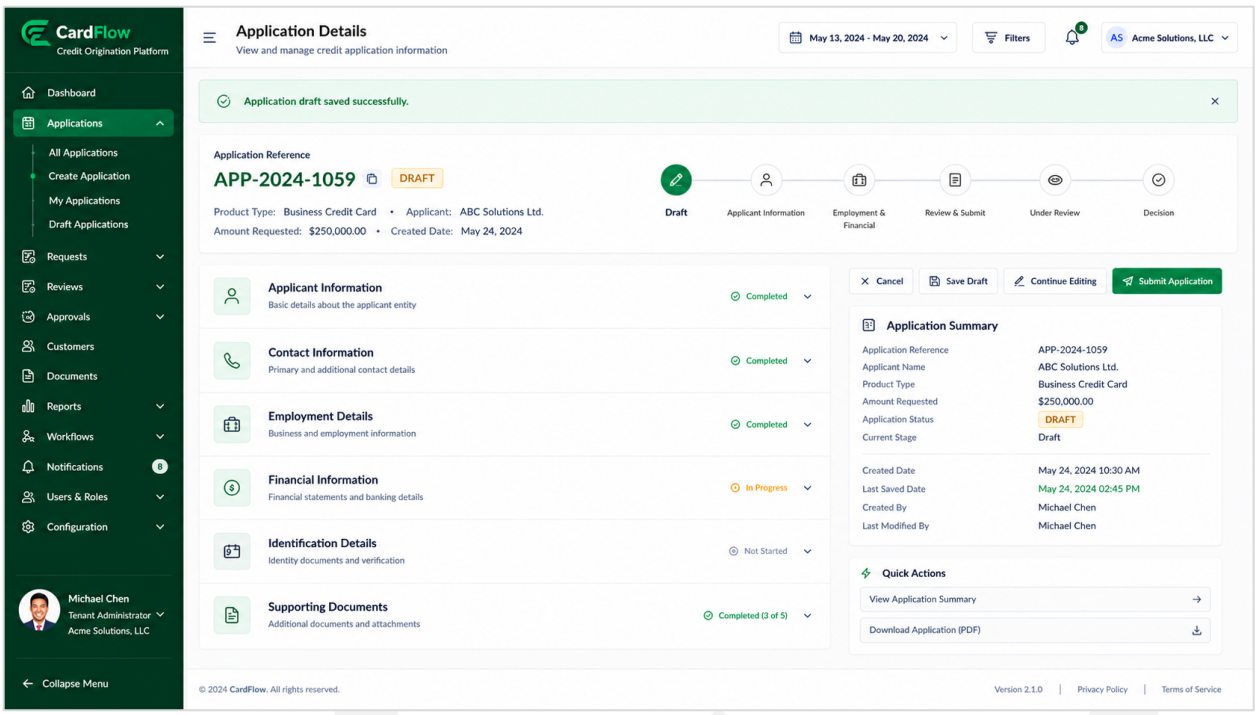

Figure 12 Saving Draft Application – Application Details (Draft)

4.5.Submitting an Application

Once all required information and supporting documents have been provided, the application can be submitted for processing.

To submit an application:

1. Review the application details.
2. Verify that all mandatory information has been completed.
3. Confirm that required documents have been uploaded.
4. Click **Submit Application**.
5. Confirm the submission.

Result: After submission, the application enters the workflow lifecycle and becomes available for validation and review activities.

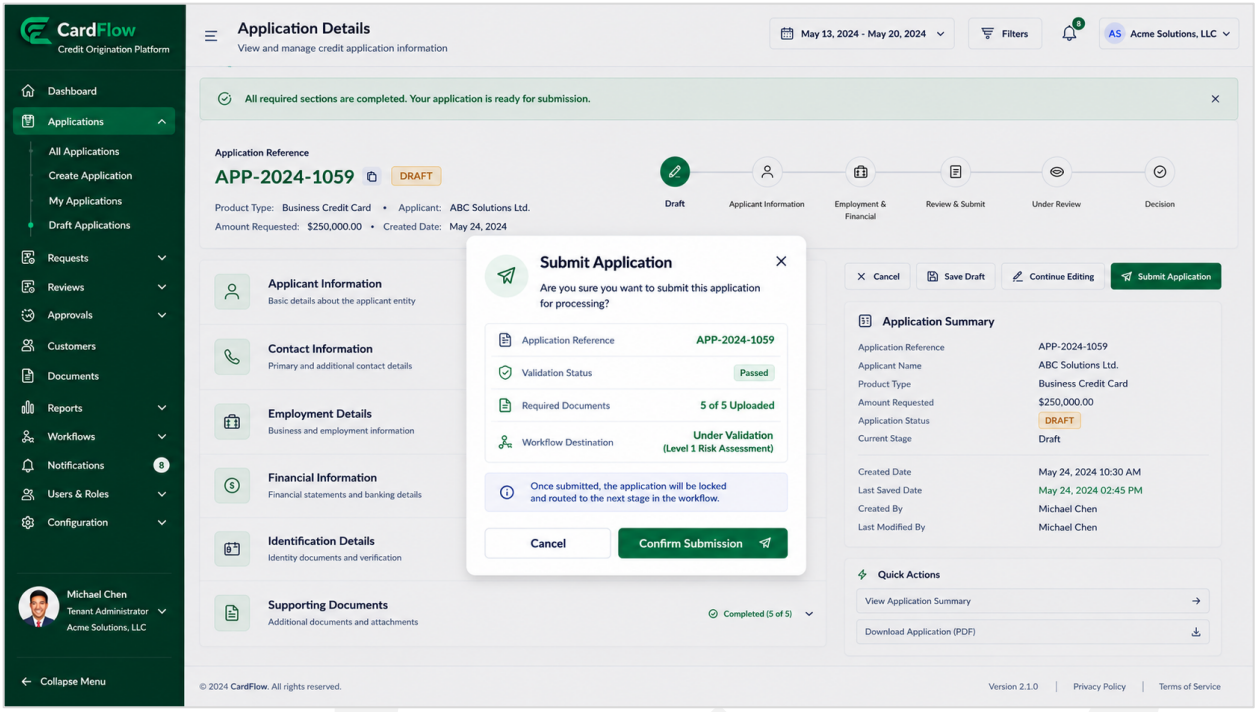

Figure 13 Submitting an Application – Confirm Submission

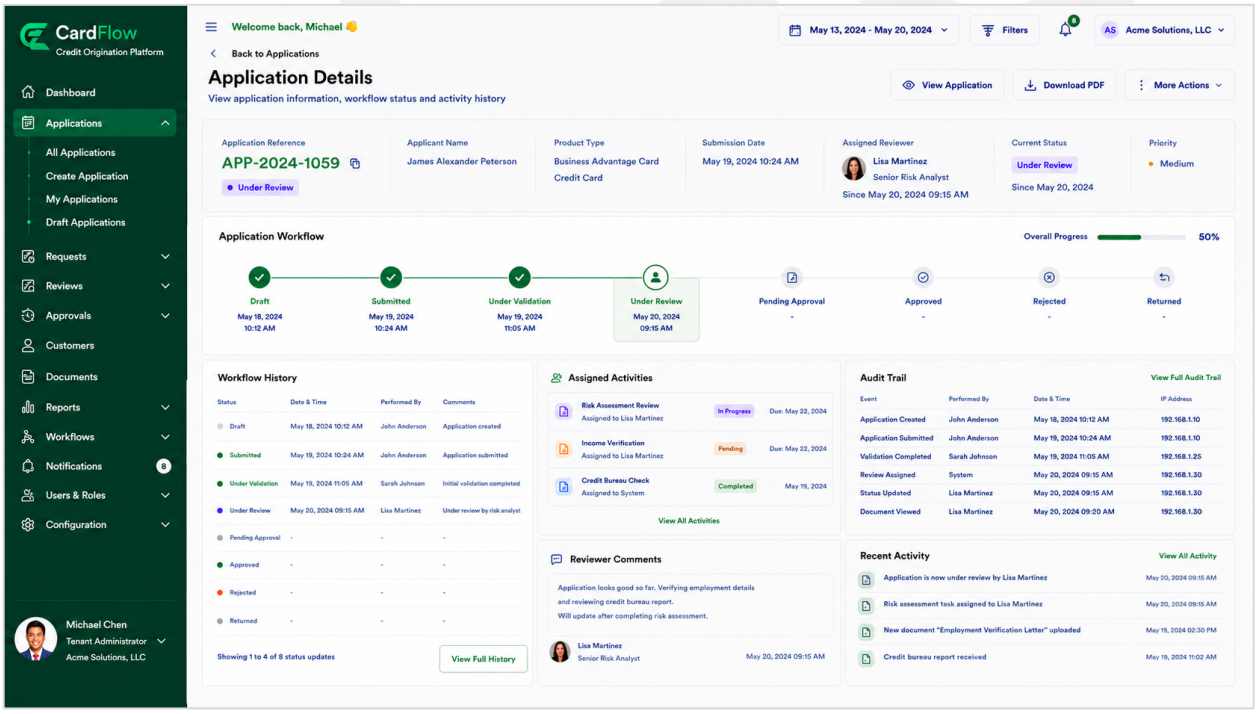

Figure 14 Submitting an Application – Application Details

4.6.Tracking Application Status

Users can monitor application progress throughout the credit origination lifecycle.

Application statuses may include:

- **Draft**
- **Submitted**
- **Under Validation**
- **Under Review**
- **Pending Approval**
- **Approved**
- **Rejected**
- **Returned**

Note:

Status Information is available from the dashboard, application details page, and workflow history views.

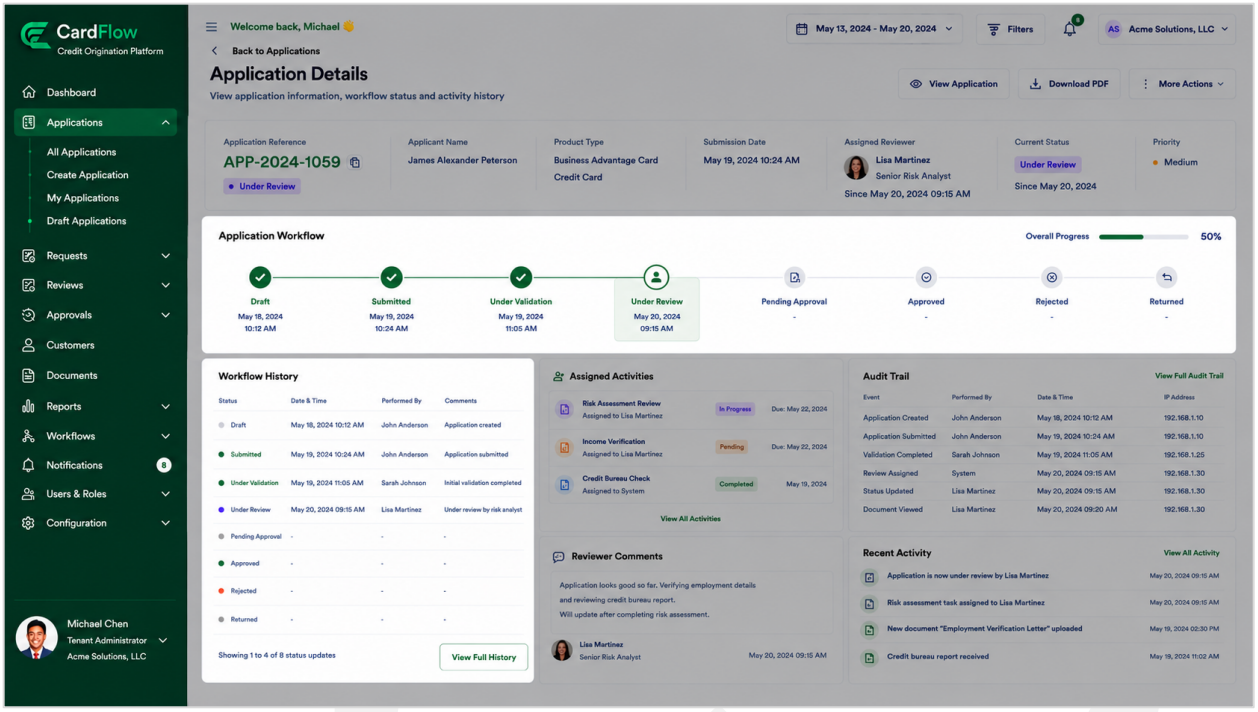

Figure 15 Tracking Application Status – Application Workflow and Workflow History

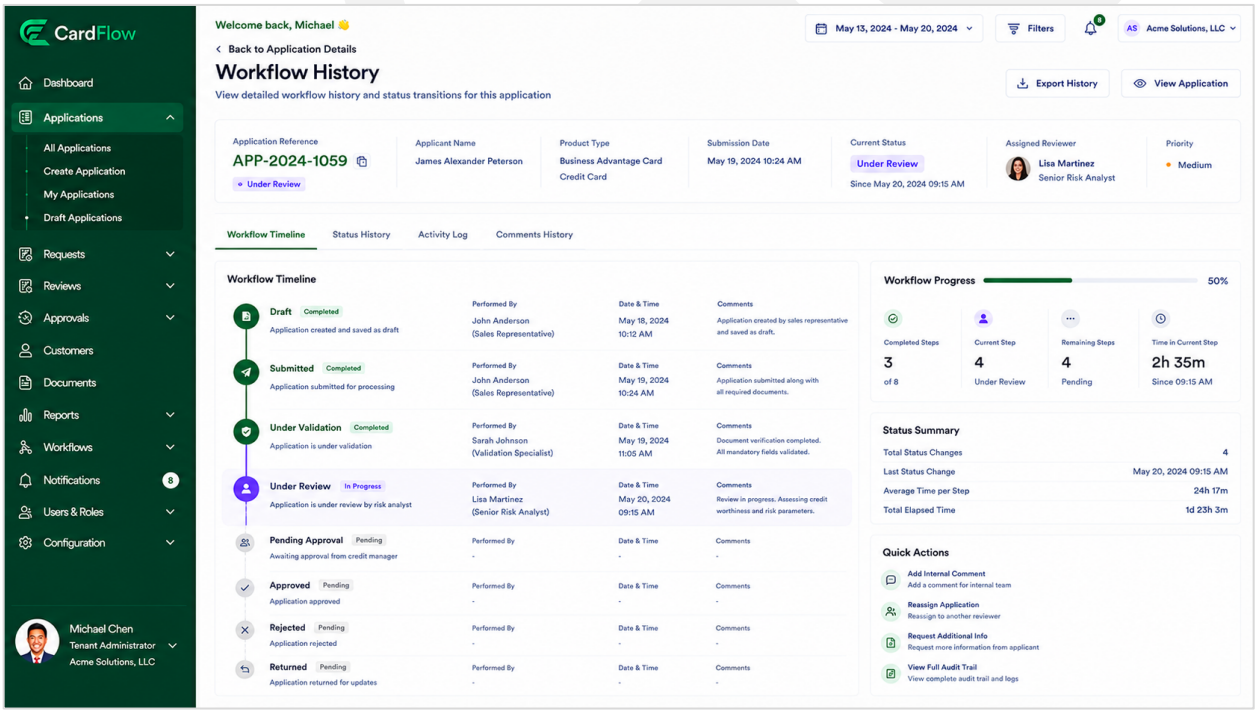

Figure 16 Tracking Application Status – Workflow History Screen

4.7.Correcting Returned Applications

Applications may be returned when additional information, clarification, or document updates are required.

To update a returned application:

1. Open the returned application.
2. Review reviewer comments and return reasons.
3. Update the required information.
4. Upload revised or additional documents, if necessary.
5. Click Resubmit Application.

Result: The application re-enters the workflow for continued processing and review.

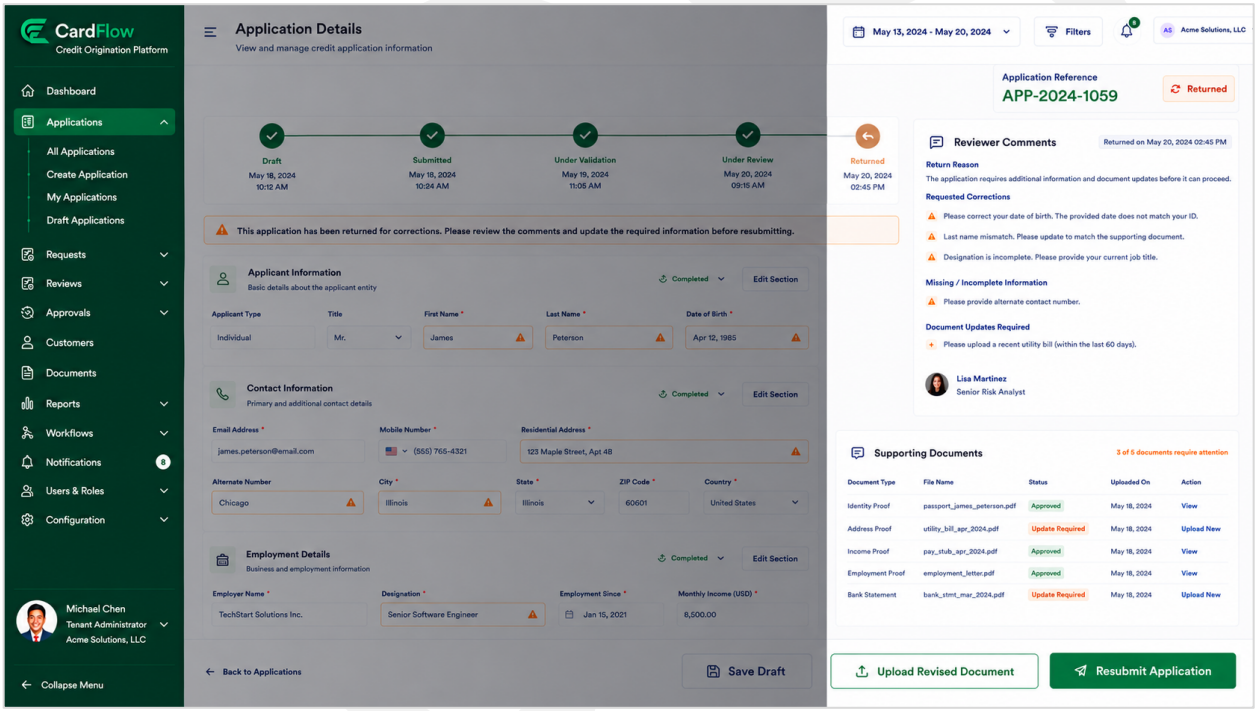

Figure 17 Correcting Returned Applications – Returned Application Details screen

5. Credit Amendment Requests

The **Credit Amendment** feature allows authorized users to request changes to existing credit applications or account information. Amendment requests undergo validation, review, and approval before any changes are applied to the selected record.

5.1.Locating an Existing Record

Before creating an amendment request, locate the credit application or account that requires modification.

To locate an existing record:

1. Navigate to **Applications** > **All Applications** *(Figure 6 Credit Application Processing – Applications Screen)*.
2. Use the search field to locate the application by:
    - **Application Reference Number**
    - **Applicant Name**
    - **Account Number**
    - **Other available search criteria**

3. Review the search results.

4. Select the appropriate record to open the **Application Details** *(Figure 14 Submitting an Application – Application Details*) screen.

5. Verify that the record is eligible for amendment before proceeding.

Result: The selected application or account record is displayed and ready for amendment processing.

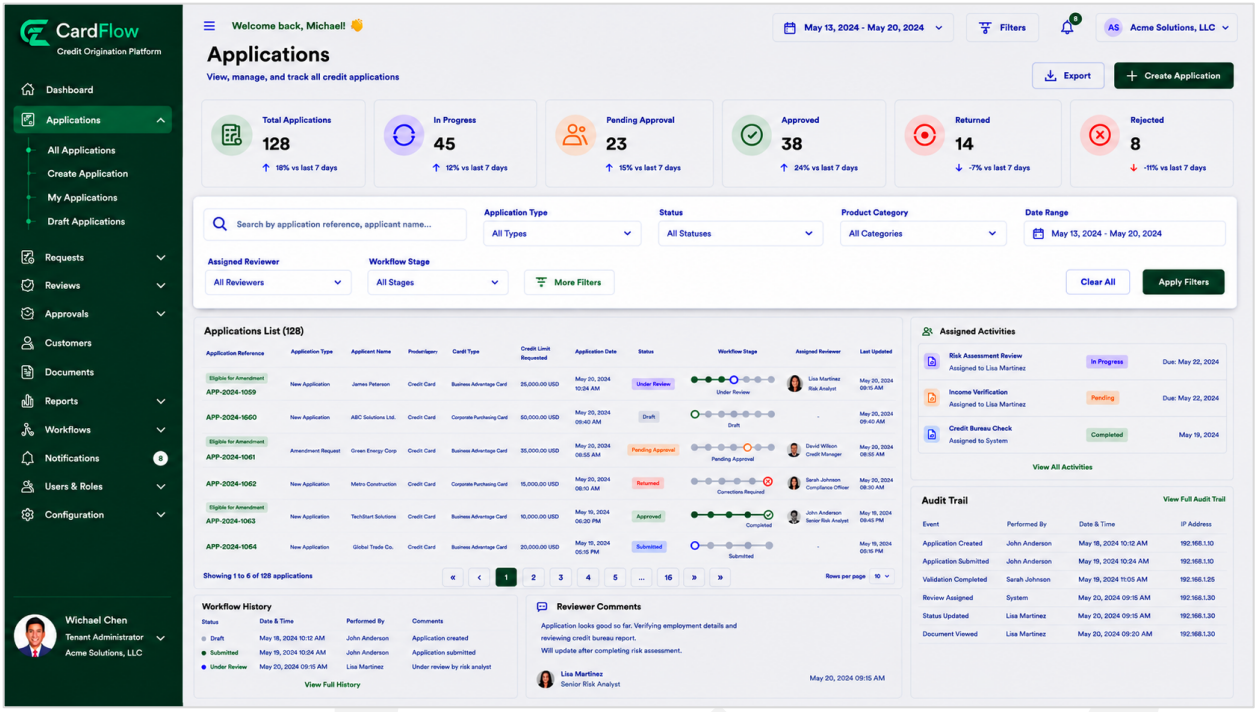

Figure 18 Locating an Existing Record – Search Filters

5.2.Creating an Amendment Request

Create an amendment request to initiate modifications to an existing application or account.

To create an amendment request:

1. Open the application or account record.

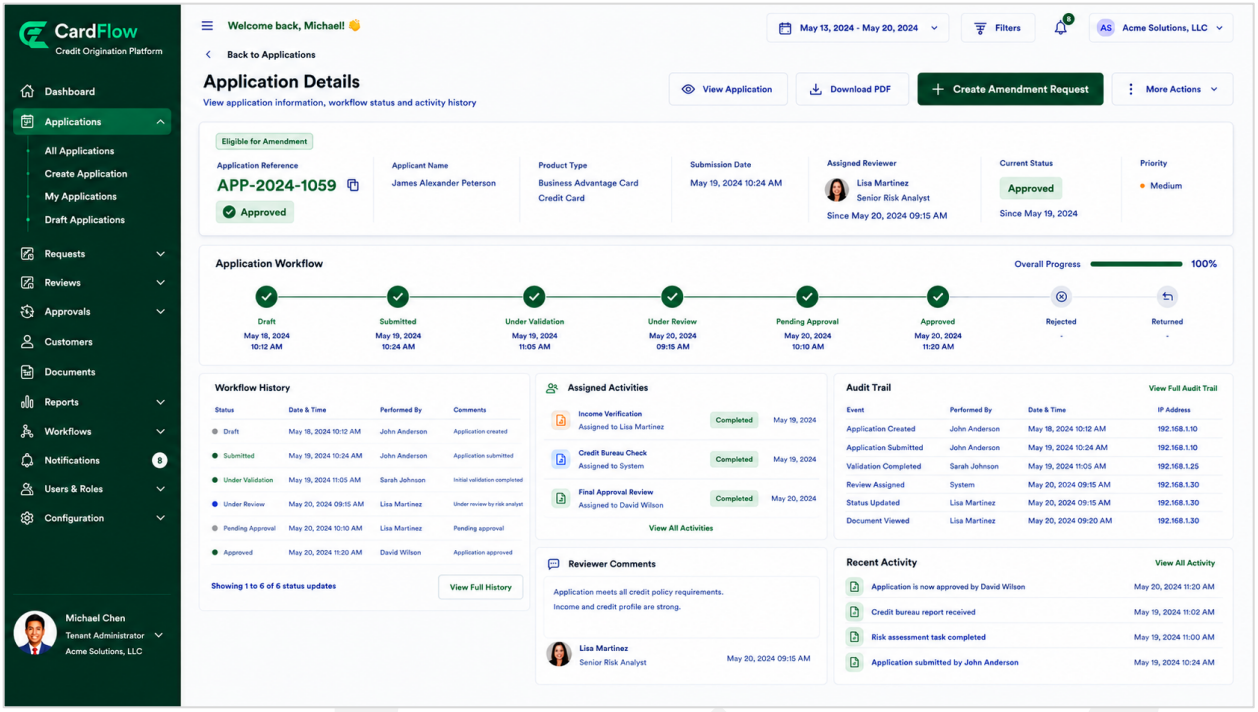

Figure 19 Creating an Amendment Request – Creating an Amendment Request Button

2. Click **Create Amendment Request**

   Create Amendment Request screen displays.

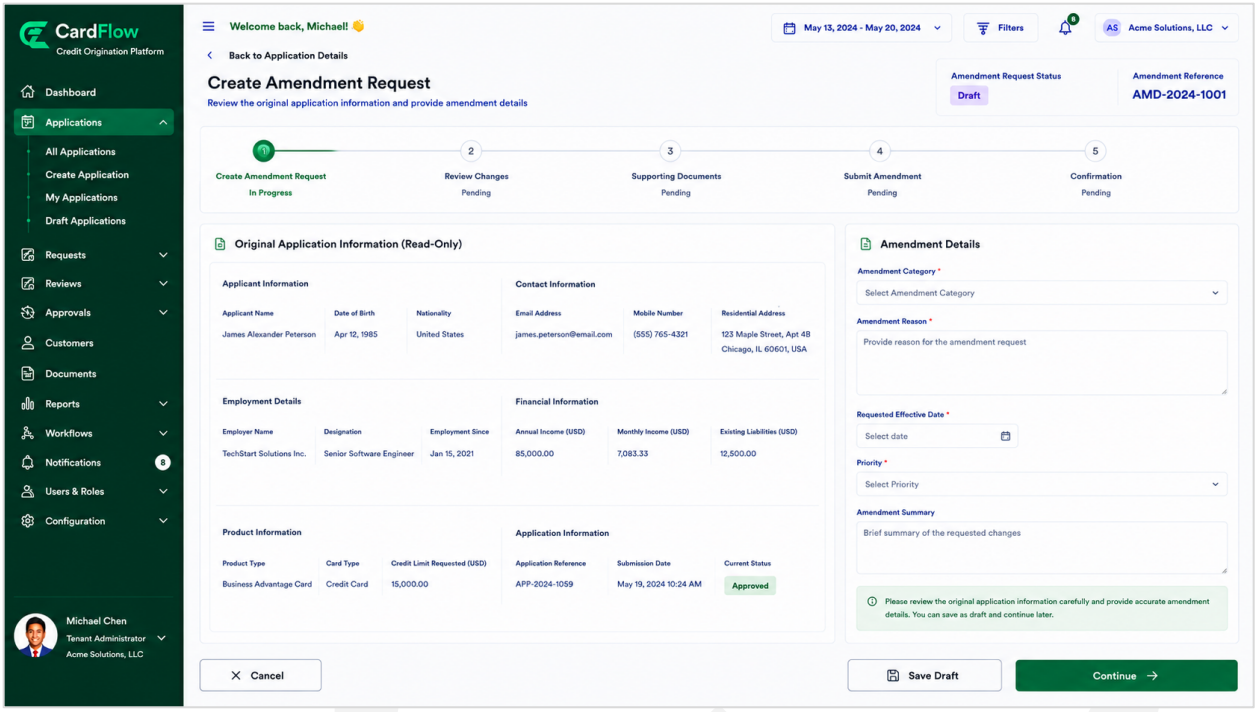

Figure 20 Creating an Amendment Request – Create Amendment Request Screen

3. Review the current application information.
4. Provide a reason for the amendment.

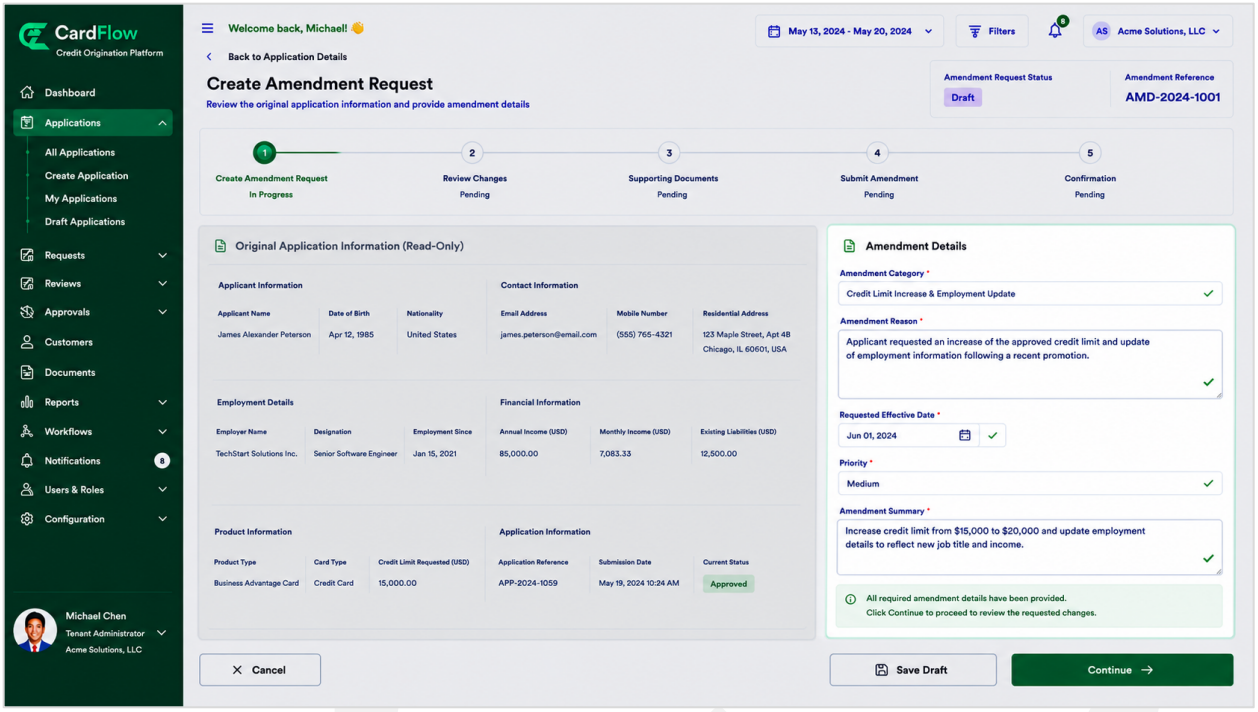

Figure 21 Creating an Amendment Request – Reasons for Amendment

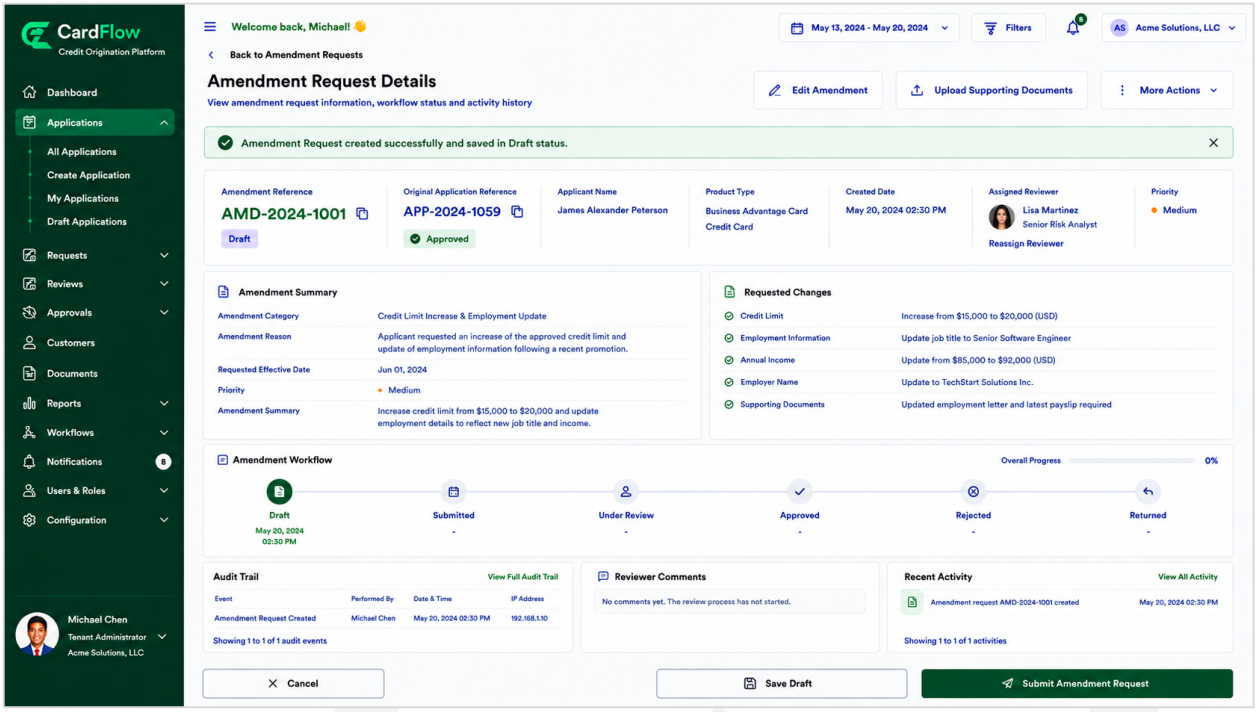
5. Confirm that the request details are correct.
6. Click **Continue**.

   The system verifies whether the selected record is eligible for amendment processing.

Result: A new amendment request is created and saved in **Draft** status.



5.3.Updating Information

Update the information that requires modification as part of the amendment request.

To update information:

1. Open the amendment request.
2. Navigate to the section requiring modification.
3. Update the necessary fields.

   Examples of information that may be updated include:

   - Applicant details
   - Contact information
   - Employment information
   - Financial information
   - Credit card details
   - Other application-specific information
4. Review the modified information for accuracy.

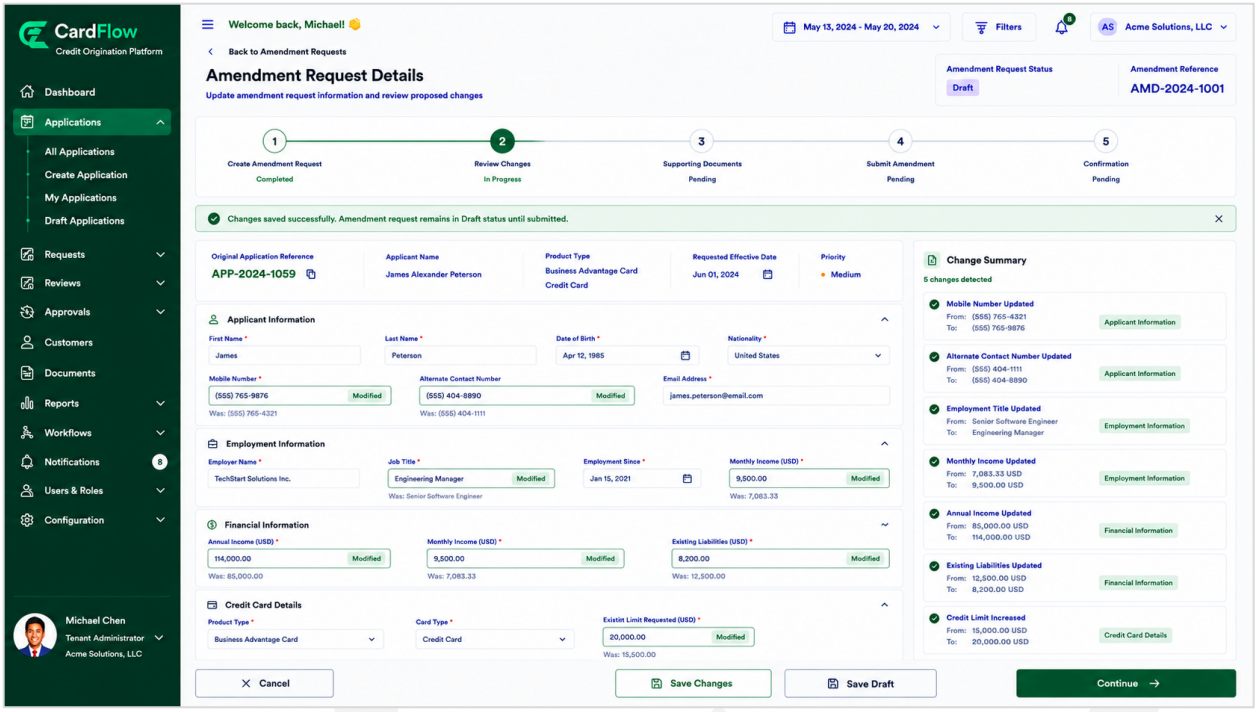


Figure 22 Updating Information

5. Save your changes.

Result: The updated information is stored in the amendment request and remains editable until submission.

5.4.Uploading Amendment Documents

Supporting documents may be required to justify the requested changes.

To upload amendment documents:

1. Open the amendment request.
2. Navigate to the **Supporting Documents** section.
3. Click **Upload Document**.
4. Select the appropriate document category.
5. Browse and select the file to upload.
6. Click **Upload**.
7. Repeat the process for additional supporting documents if required.

The system validates uploaded documents based on configured file type and file size requirements.

Result: The uploaded documents are attached to the amendment request and become available for review.

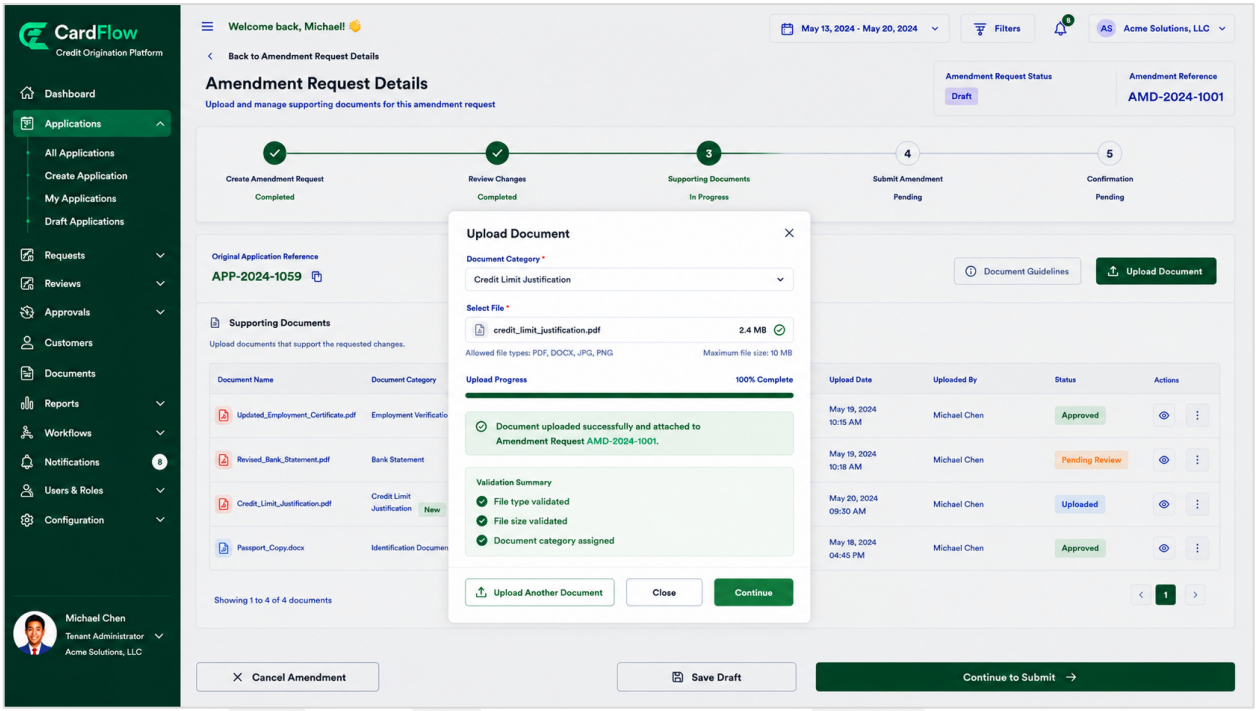

Figure 23 Uploading Amendment Documents

5.5.Submitting an Amendment Request

Submit the amendment request after all updates and supporting documents have been provided.

To submit an amendment request:

1. Review all modified information.
2. Verify that all required supporting documents have been uploaded.
3. Click **Submit Amendment Request**.
4. Confirm the submission when prompted.

   The system performs validation checks to ensure:

   - Required fields are completed.
   - Supporting documents are provided.

- Uploaded files meet format and size requirements.
- The requested changes comply with configured business rules.

If validation fails, the request is returned for correction.

Result: The amendment request is submitted and progresses to the review workflow.

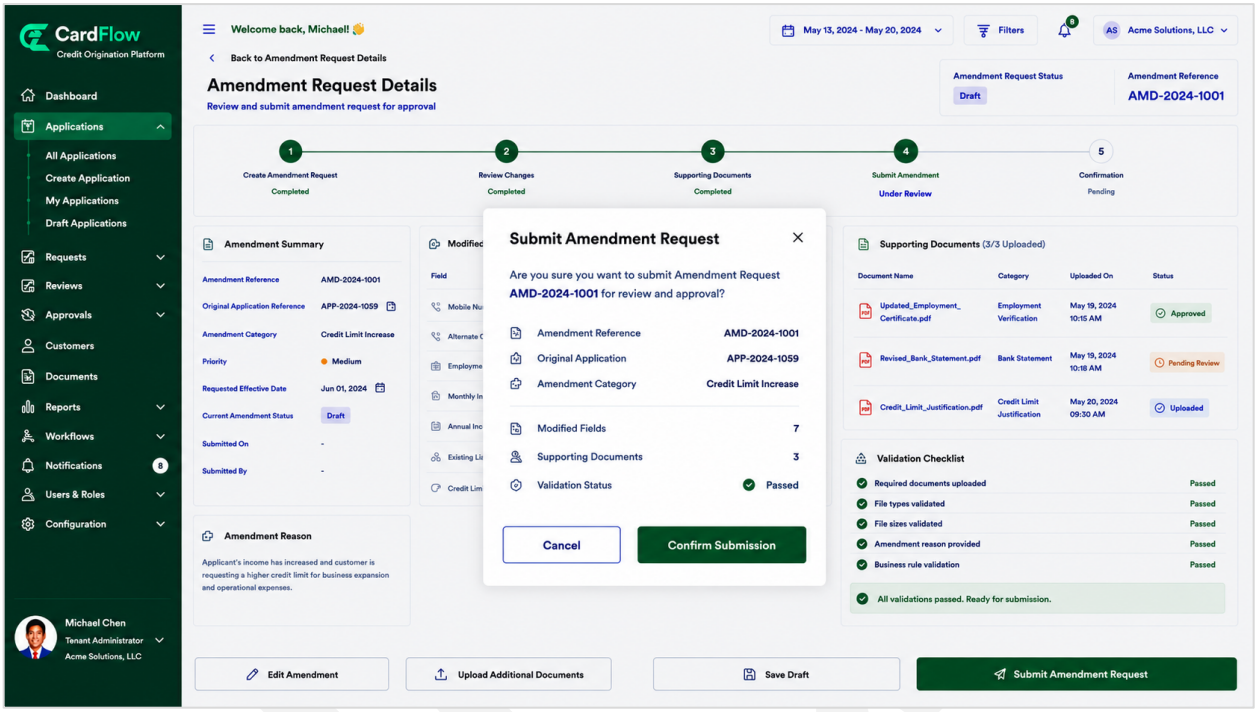

Figure 24 Submitting an Amendment Request

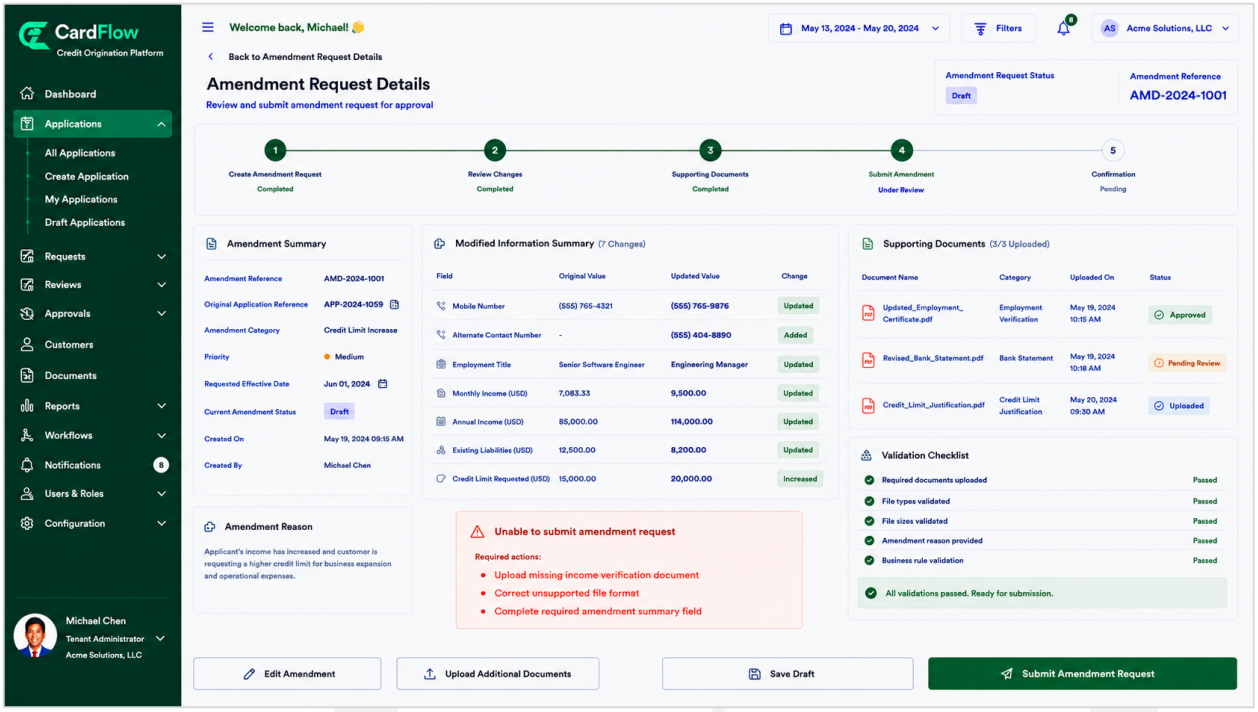

Figure 25 Submitting an Amendment Request – Failed Submission Scenario

5.6.Monitoring Amendment Status

After submission, monitor the amendment request throughout the review and approval process.

To monitor amendment status:

1. Navigate to **Applications** > **My Applications** or **My Requests**.
2. Locate the amendment request.
3. Review the current workflow status.

Table 3 Amendment Request Workflow Status

Status	Description
Draft	Amendment request is being prepared and has not been submitted.
Submitted	Request has been submitted for processing.
Under Review	Request is being evaluated by a reviewer.

Status	Description
Pending Approval	Request is awaiting approver decision.
Approved	Amendment has been approved and applied.
Returned	Request requires correction or additional information.
Rejected	Amendment request has been rejected and no changes were applied.

4. Open the request to view detailed status information, comments, and history.

   If a request is returned, review the comments provided, make the required updates, and resubmit the request.

Result: Users can track amendment progress and respond to review or approval feedback as needed.

.

6. Credit Reinstatement Requests

The **Credit Reinstatement** workflow enables authorized users to request the reactivation of previously suspended or inactive credit accounts. Reinstatement requests are reviewed and validated before approval to ensure that account reactivation complies with business, operational, and regulatory requirements.

6.1.Finding an Inactive Account

Locate the inactive or suspended account that requires reinstatement before creating a reinstatement request.

To find an inactive account:

1. Open the **Applications** page.
2. Use the search field to locate the account by:
    - **Application Reference Number**
    - **Applicant Name**
    - **Customer ID**
3. Apply filters as needed.
4. Select **Inactive**, **Suspended**, or **Closed** status.
5. Open the account record.

Result: The account details page is displayed, showing the current account status and reinstatement eligibility information.

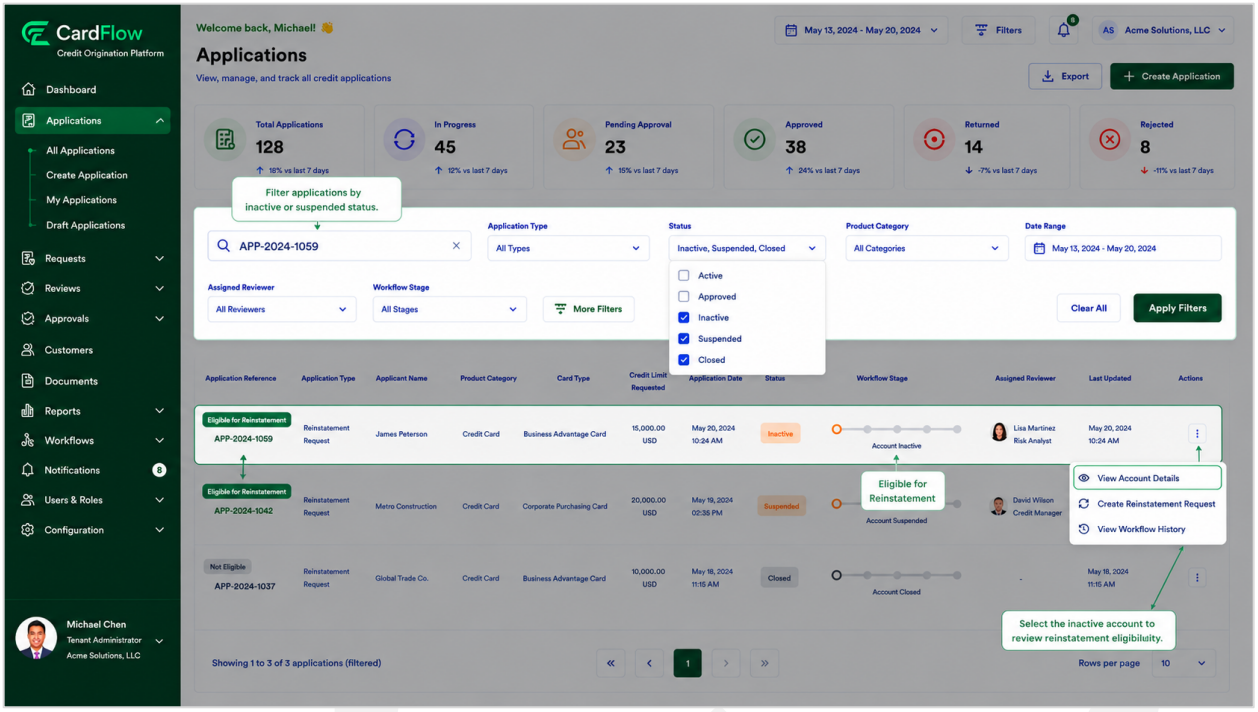

Figure 26 Finding an Inactive Account

6.2.Creating a Reinstatement Request

Create a reinstatement request to initiate the account reactivation process.

To create a reinstatement request:

1. Open the inactive account record.
2. Click **Create Reinstatement Request**.
3. Review the account information.
4. Provide the reason for reinstatement.
5. Verify that the request details are correct.
6. Click **Continue**.

   The system validates whether the selected account is eligible for reinstatement processing.

Result: A new reinstatement request is created and saved in **Draft** status.

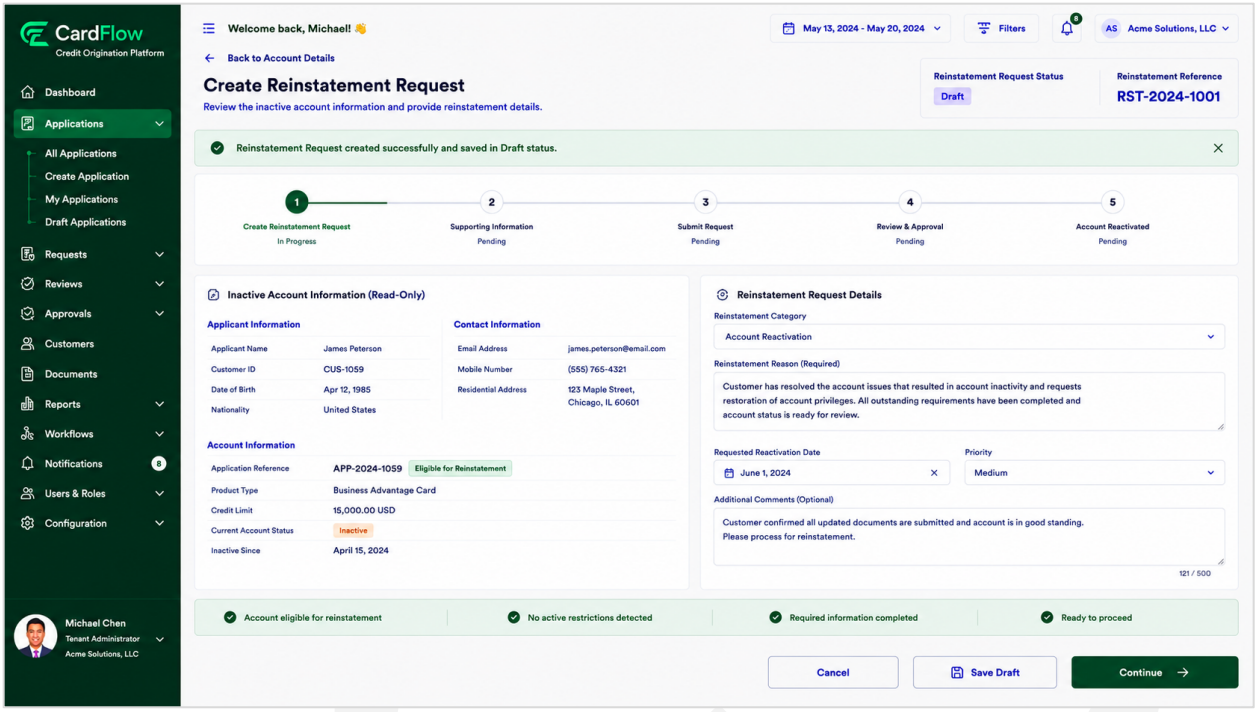

Figure 27 Creating a Reinstatement Request – Create Reinstatement Request Screen

6.3.Providing Supporting Information

Provide supporting details and documentation required to justify the account reactivation request.

To provide supporting information:

1. Open the reinstatement request.
2. Navigate to the appropriate section.
3. Enter the required reinstatement details.
4. Provide supporting justification.
5. Upload any required supporting documents.
6. Save your changes.

Examples of supporting information may include:

- Updated customer contact information
- Employment verification
- Updated financial information

- Proof of payment or settlement
- Compliance documentation
- Account reactivation justification

Result: The supporting information is saved and remains editable until the request is submitted.

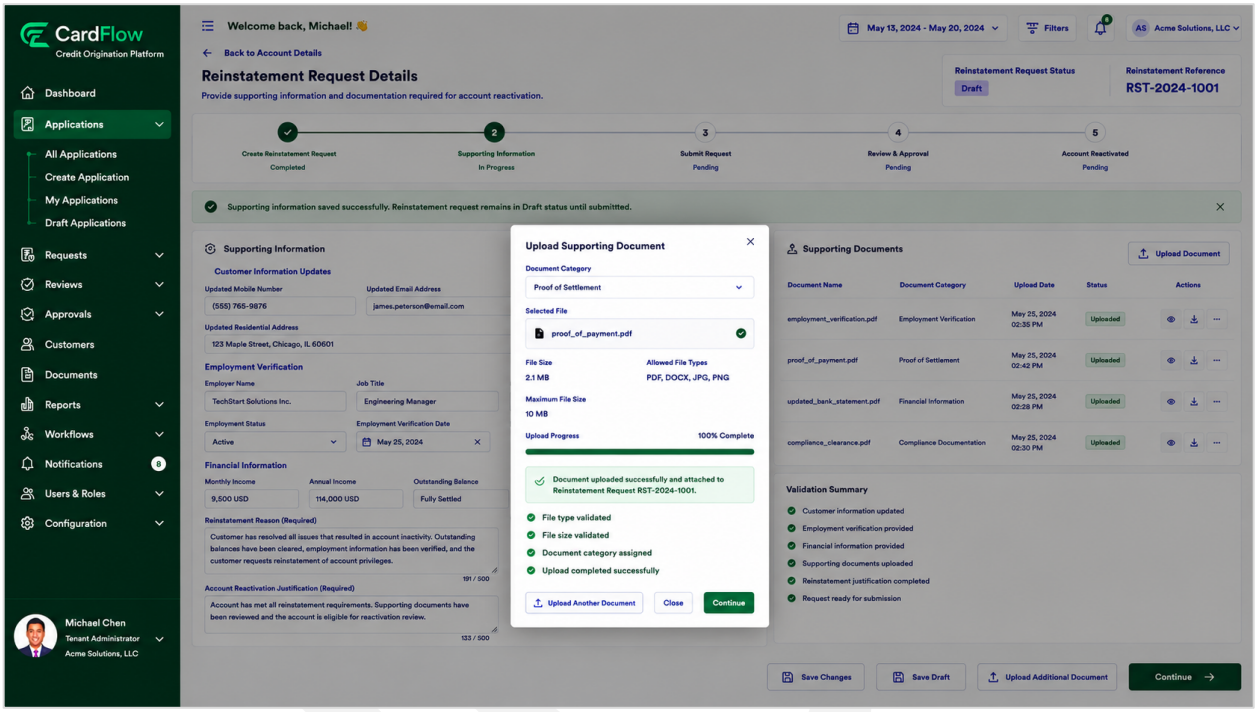

Figure 28 Providing Supporting Information

6.4.Submitting the Request

Submit the reinstatement request after all required information and supporting documents have been provided.

To submit a reinstatement request:

1. Review the reinstatement request details.
2. Verify that all required documents have been uploaded.
3. Click **Submit Reinstatement Request**.
4. Confirm the submission when prompted.

   The system performs validation checks to ensure:

   - Required fields are completed

- Supporting documentation is provided
- Uploaded files meet file type and size requirements
- Reinstatement eligibility requirements are satisfied
- Business rules and compliance requirements are met

If validation fails, the request is returned for correction.

Result: The reinstatement request is submitted and enters the review workflow.

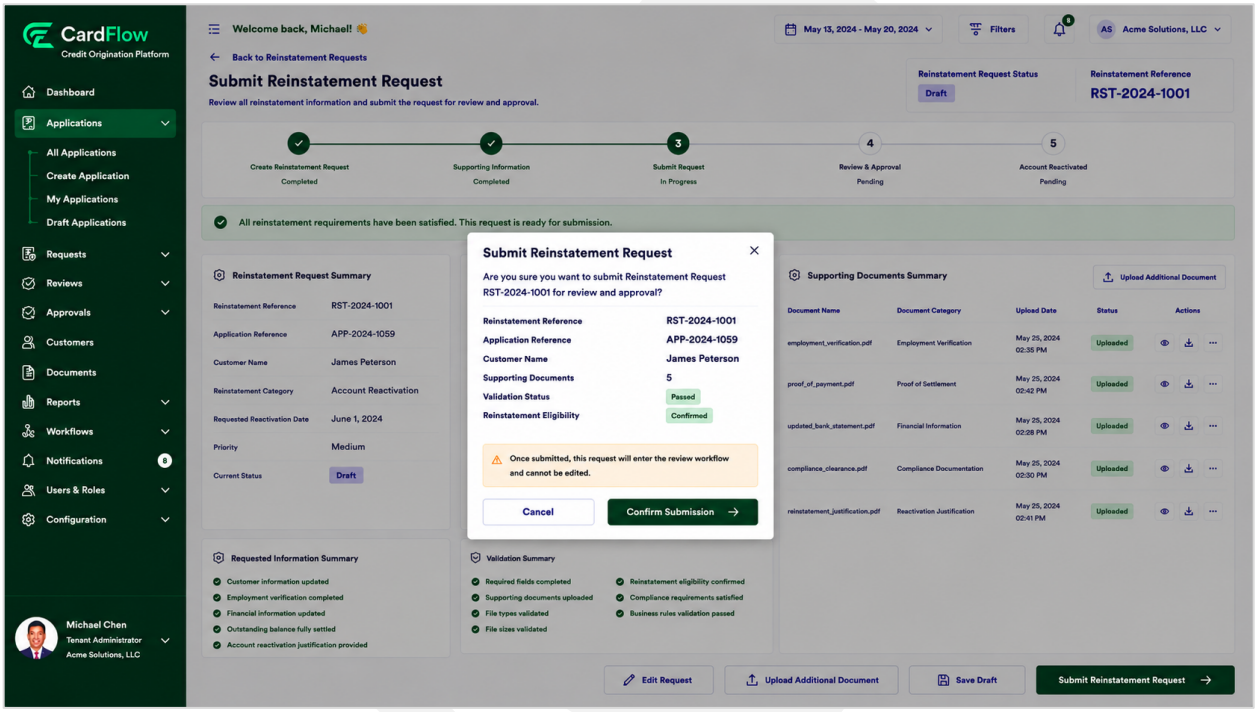

Figure 29 Submitting the Request

6.5.Tracking Reinstatement Progress

Monitor the progress of a reinstatement request throughout the review and approval process.

To track reinstatement progress:

1. Open the reinstatement request.
2. Review the status displayed on the request.
3. Monitor the workflow timeline.
4. Review comments and activities provided by reviewers and approvers.

5. Check notifications for status updates.

   Typical reinstatement statuses include:

   - **Draft**
   - **Submitted**
   - **Under Validation**
   - **Under Review**
   - **Pending Approval**
   - **Approved**
   - **Rejected**
   - **Returned**

Result: Users can monitor request progress, review workflow activities, and determine whether additional action is required.

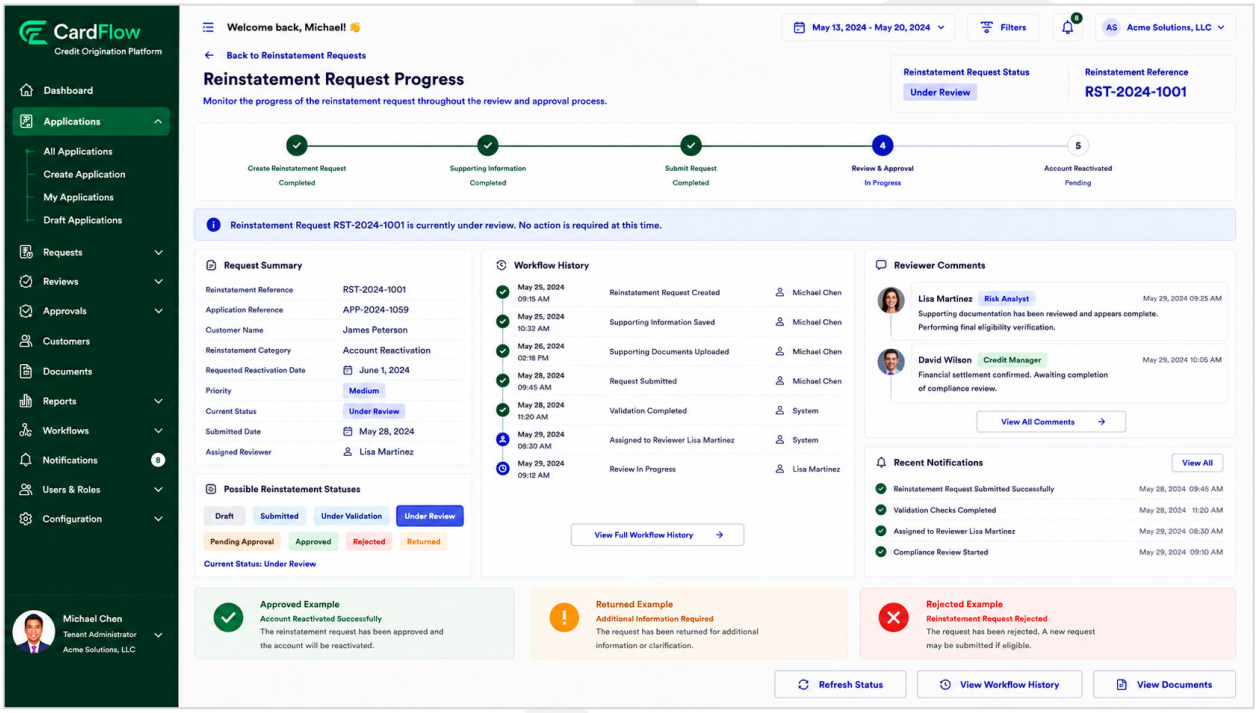

Figure 30 Tracking Reinstatement Progress

Figure 31 Tracking Reinstatement Progress – Returned Reinstatement

7. Reviewer Functions

This section describes the tasks performed by Reviewers when evaluating credit applications, amendment requests, and reinstatement requests. Reviewers are responsible for assessing submitted information and supporting documents, determining completeness, and deciding whether requests should proceed to approval or be returned for correction.

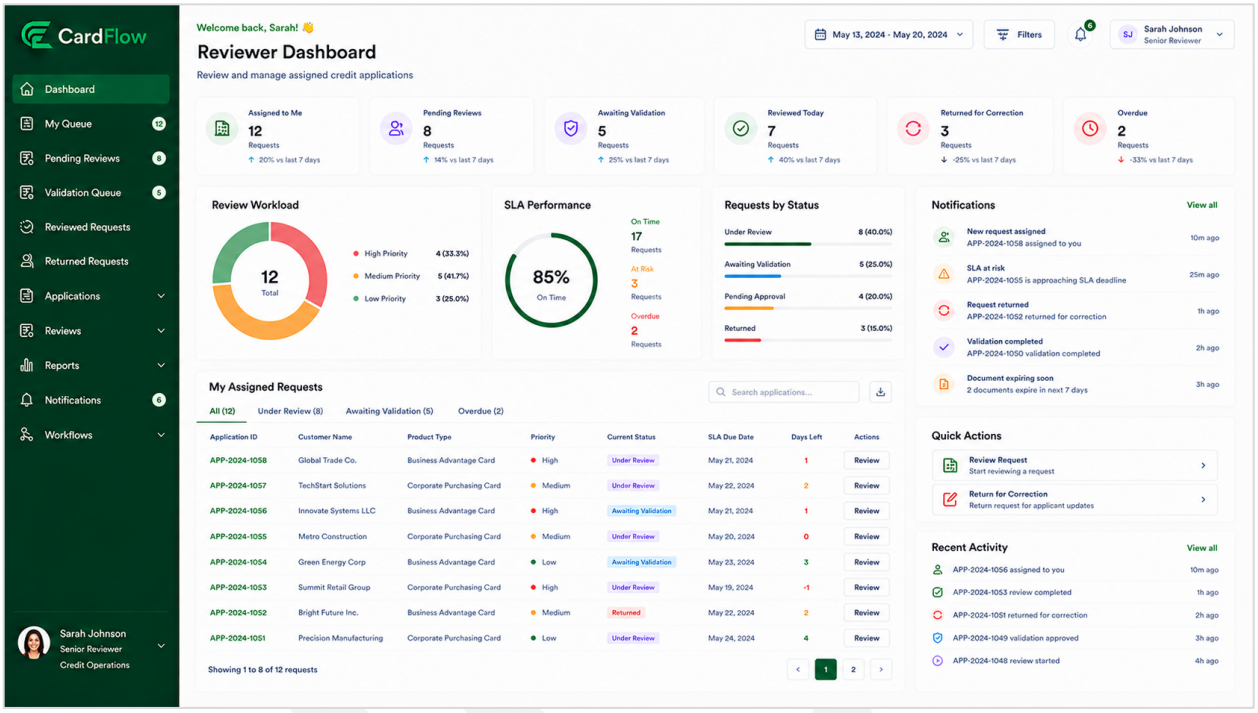

Figure 32 Reviewer Dashboard

7.1.Accessing Assigned Requests

Reviewers can access requests assigned to them through the review work queue.

To access assigned requests:

1. Navigate to **Reviews**.
2. Select **My Assigned Requests**.
3. Use the available filters to locate a specific request.
4. Click the request reference number to open the request details page.

Result: The selected request is displayed for review.

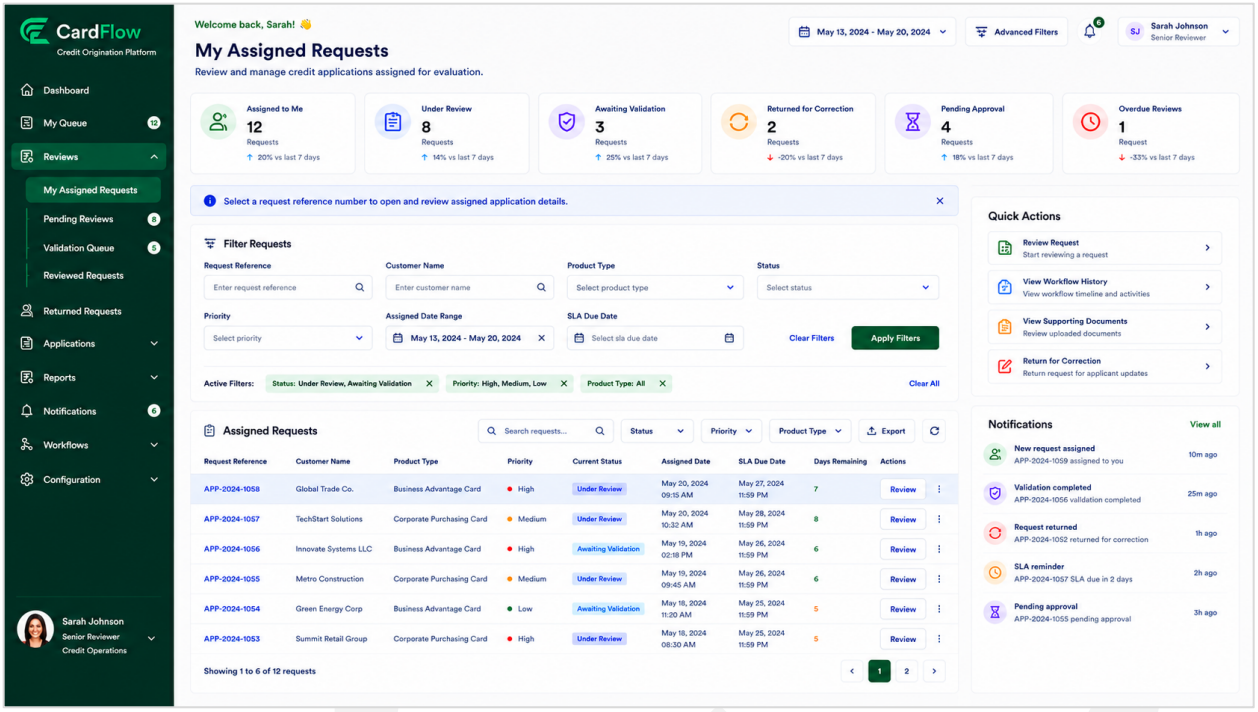

Figure 33 Accessing Assigned Requests – My Assigned Requests Screen

7.2.Reviewing Request Details

Reviewers can review submitted information before making a routing decision.

To review request details:

1. Open the assigned request.
2. Review the request summary information.
3. Verify submitted applicant or account information.
4. Review workflow status and request history.
5. Review any comments provided during submission.

Result: The reviewer can determine whether the request contains sufficient information for processing.

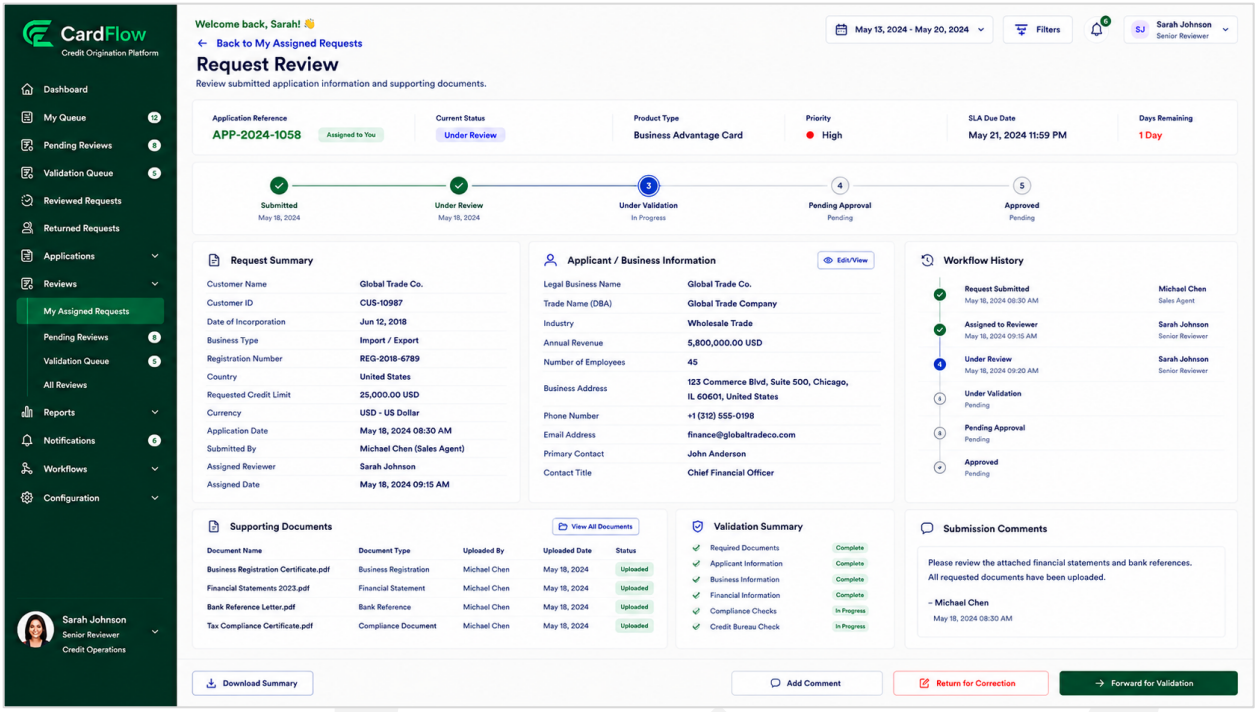

Figure 34 Reviewing Request Details – Request Review Screen

7.3.Reviewing Supporting Documents

Reviewers can review uploaded supporting documents associated with a request.

To review supporting documents:

1. Open the request.
2. Navigate to the **Supporting Documents** section.
3. Select a document from the document list.
4. Review the document contents.
5. Verify that all required supporting documentation has been provided.

Result: The reviewer confirms whether the submitted documentation supports the request.

Figure 35 Reviewing Supporting Documents

7.4.Reviewing Workflow History Comments

Reviewers can review historical workflow activities and previous comments associated with a request.

To review workflow history:

1. Open the request.
2. Navigate to **Workflow History**.
3. Review status transitions and activities.
4. Review reviewer and approver comments, if any.
5. Review previous return reasons, if applicable.

Result: The reviewer gains visibility into the complete request history.

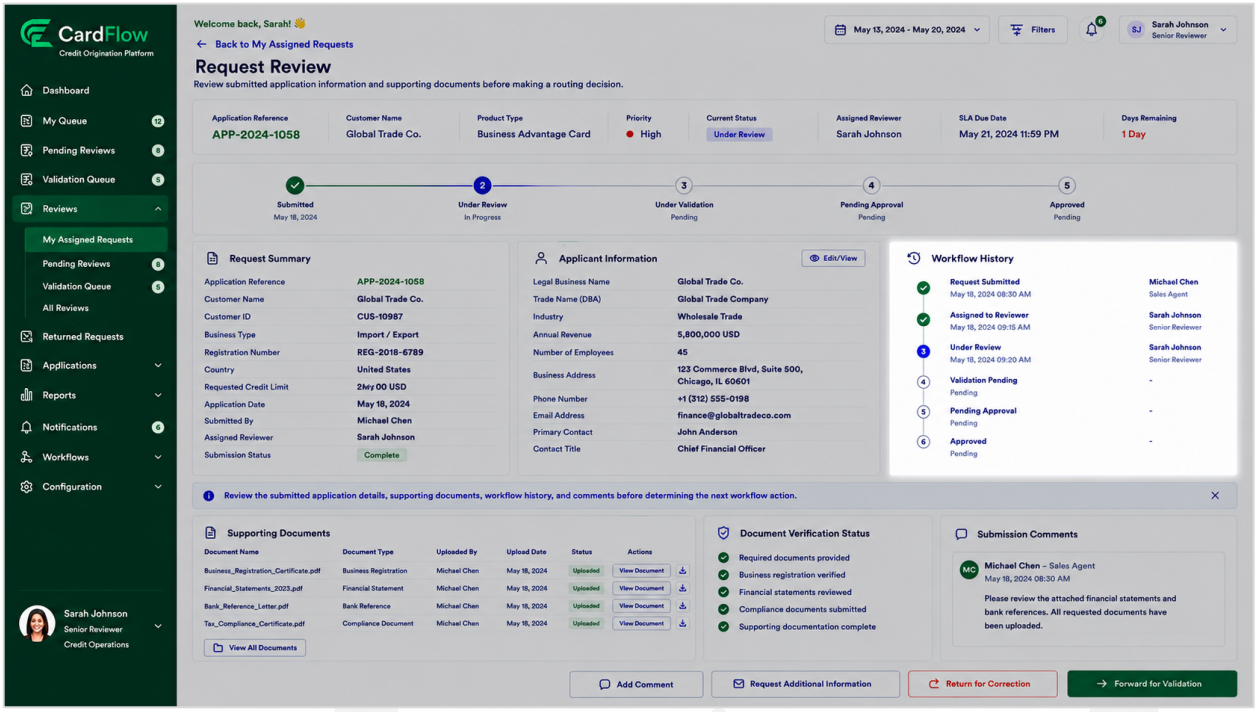

Figure 36 Reviewing Workflow History Comments

7.5.Returning Returned Requests for Correction

Reviewers can return requests when additional information or corrections are required.

To return a request:

1. Open the assigned request.
2. Review the request information and supporting documents.
3. Click **Return Request**.
4. Enter the reason for the return.
5. Specify required corrections or additional documentation.
6. Click **Submit Return** Decision.

Result:

- The request status changes to Returned.
- Return comments become available to the requester.
- The requester may update and resubmit the request.

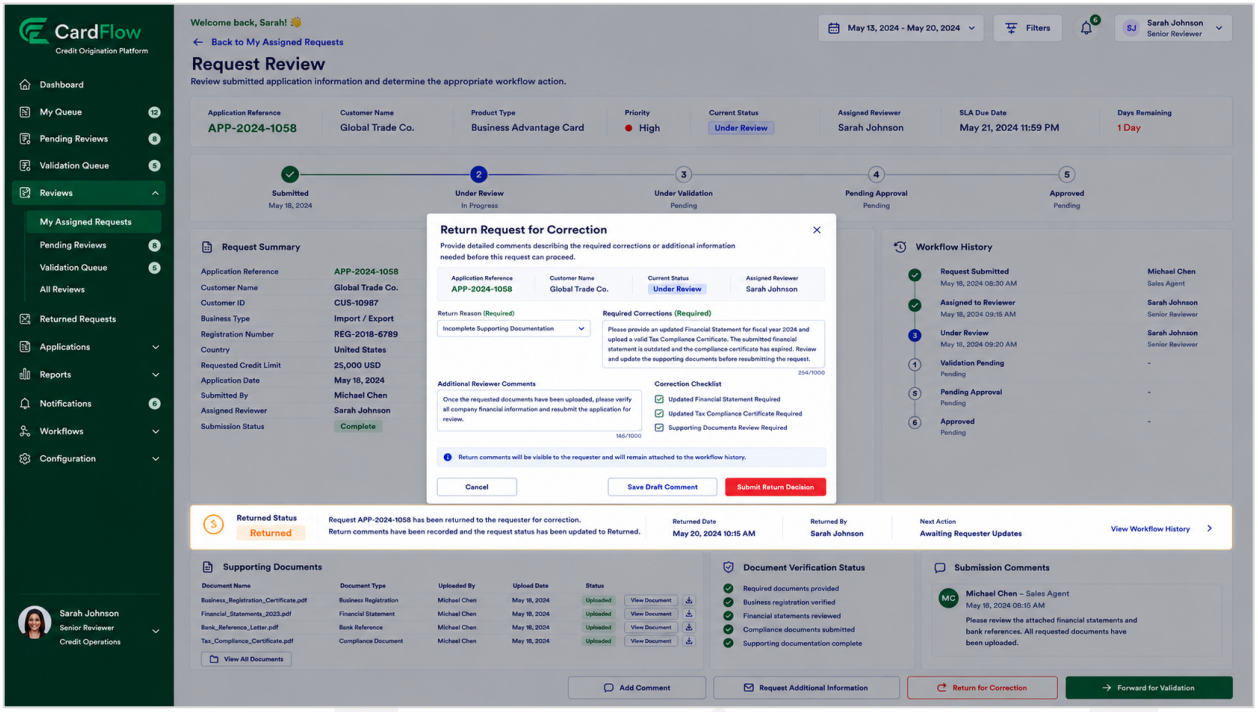

Figure 37 Returning Returned Requests for Correction

7.6.Forwarding Requests for Approval

Reviewers can forward requests that satisfy review requirements to the approval workflow.

To forward a request for approval:

1. Open the assigned request.
2. Verify that all required information is complete.
3. Verify that supporting documents have been reviewed.
4. Click **Forward for Approval**.
5. Confirm the action.

Result:

- The request is routed to the appropriate approver.
- The request status changes to Pending Approval.

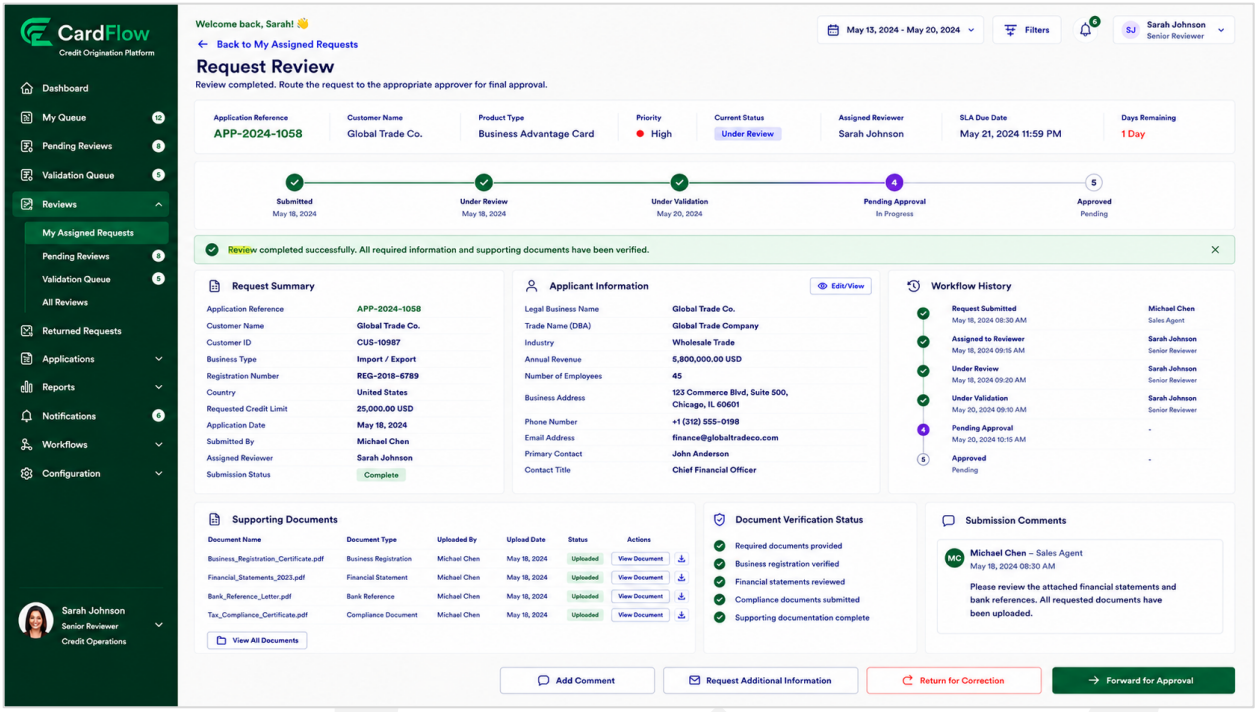

Figure 38 Forwarding Requests for Approval

7.7.Monitoring Review Activities

Reviewers can monitor requests currently assigned to them.

To monitor review activities:

1. Navigate to **Dashboard** *(See Figure 32 Reviewer Dashboard)*.
2. Review request counts by status.
3. Review pending review assignments.
4. Monitor returned and resubmitted requests.

Result: The reviewer can track workload and request progress.

8. Approver Functions

This section describes the activities performed by Approvers when reviewing requests that have completed validation and review activities and are awaiting a final decision. Approvers evaluate request information, supporting documents, workflow history, and reviewer recommendations before approving, rejecting, or returning requests.

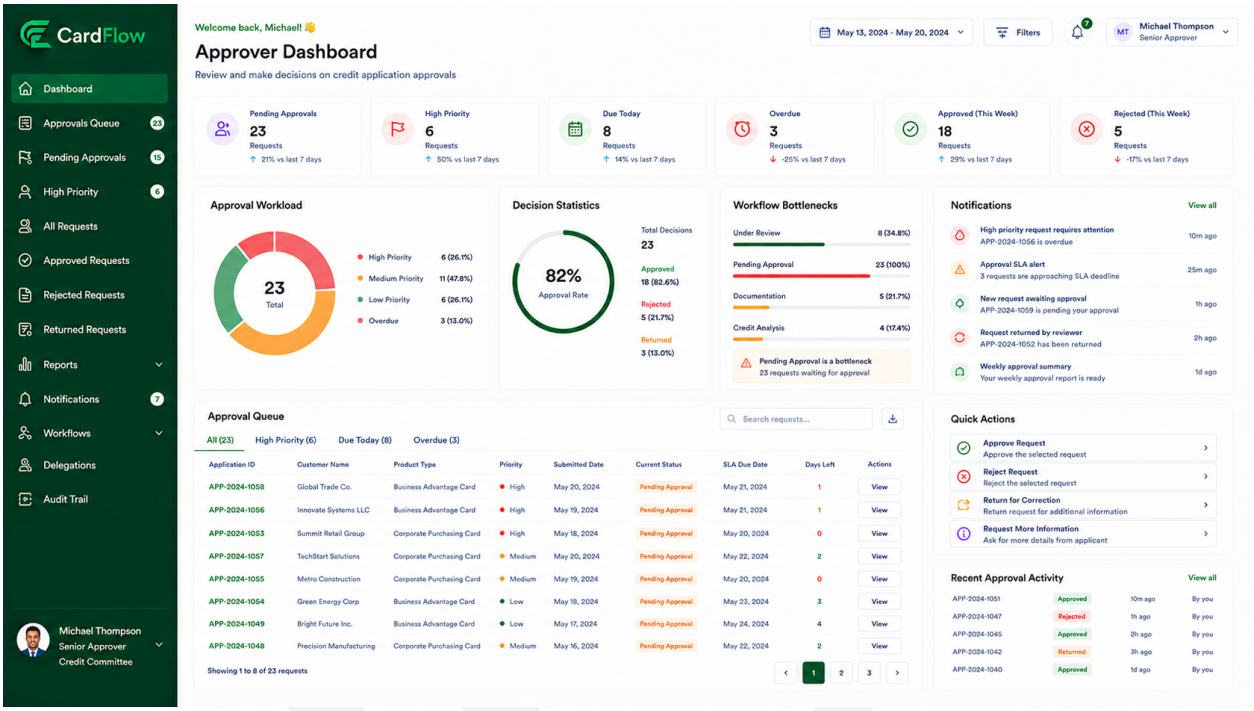

Figure 39 Approver Dashboard

8.1.Viewing Pending Approvals

Approvers can access requests that have been routed to them for approval.

To view pending approvals:

1. Navigate to **Approvals**.
2. Select **Pending Approvals**.

   The **Pending Approvals** page displays key request information including customer name, product type, priority, status, assigned approver, submission date, and SLA due date.
3. Review the list of requests awaiting approval.
4. Use available filters to locate a specific request.

5. Click the request reference number to open the request details page.

Result: The selected request is displayed for approval review.

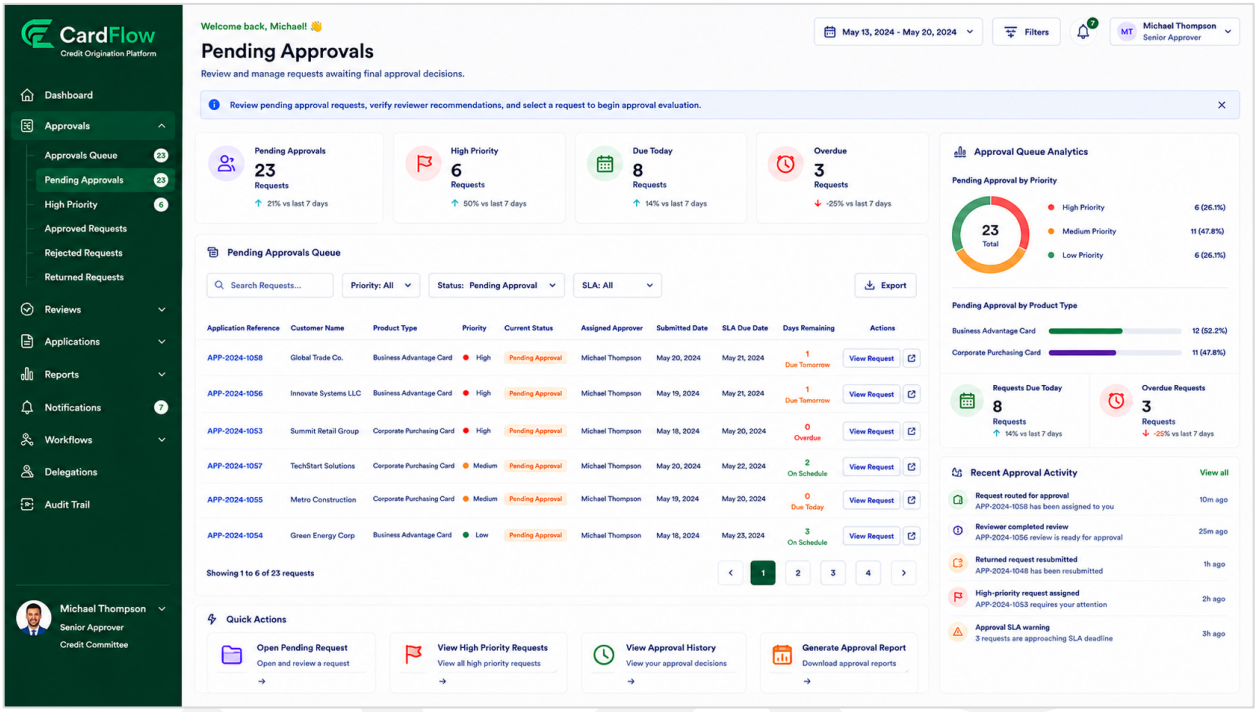

Figure 40 Viewing Pending Approvals

8.2.Reviewing Request Information

Approvers can review submitted information before making an approval decision.

To review request information:

1. Open a request from the **Pending Approvals** queue.
2. Review the request summary information.
3. Verify submitted applicant or account information.
4. Review workflow history and reviewer recommendations.
5. Review supporting documents and comments.
6. Confirm that all approval requirements have been satisfied.

Approvers should verify that:

- Required information is complete.
- Supporting documents have been reviewed.

- Validation requirements have been satisfied.
- Reviewer recommendations have been provided.
- Business and compliance requirements have been met.

Result: The approver determines whether the request is eligible for approval.

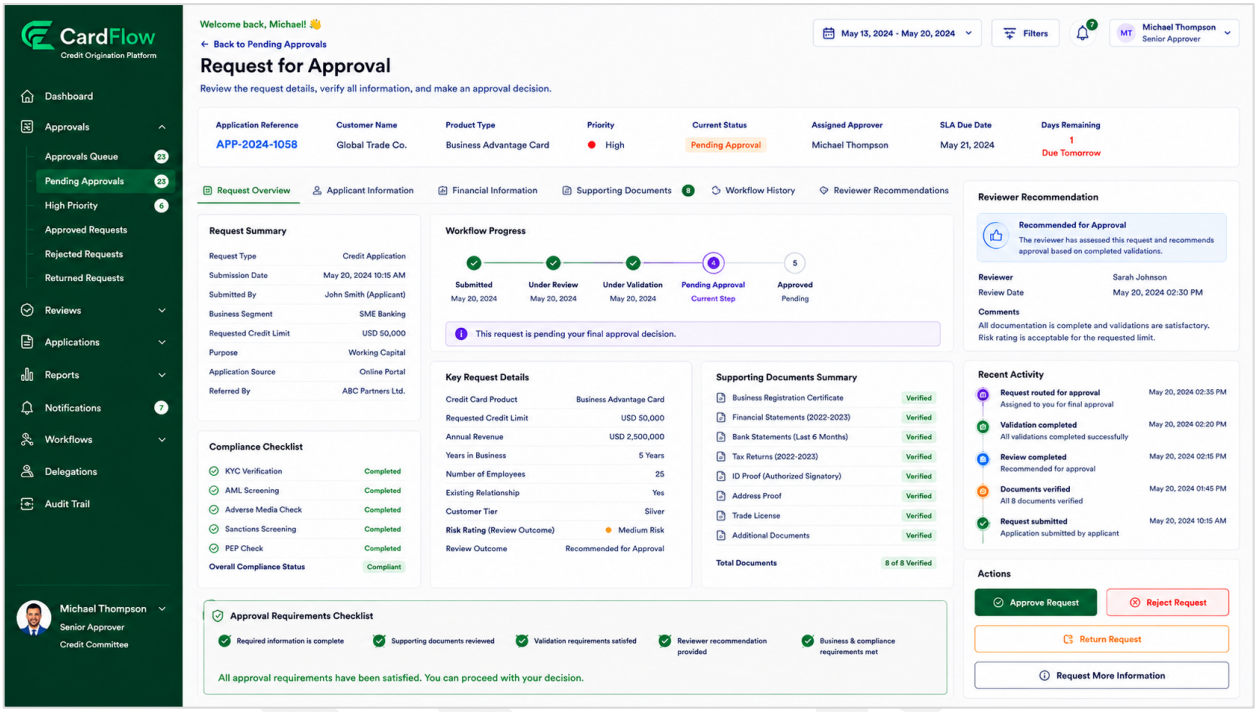

Figure 41 Reviewing Request Information

8.3.Approving Requests

Approvers can approve requests that satisfy all review and approval requirements.

To approve a request:

1. Open the request.
2. Review all submitted information and supporting documents.
3. Verify reviewer recommendations and workflow history.
4. Click **Approve Request**.
5. Enter approval comments if required.
6. Confirm the approval action.

When a request is approved:

- The request status changes to **Approved**.
- The approval decision is recorded in the workflow history.
- Audit records are generated.
- Notifications are sent to relevant users.
- Approved changes or actions are applied to the request.

Result: The request is approved and processing is completed successfully.

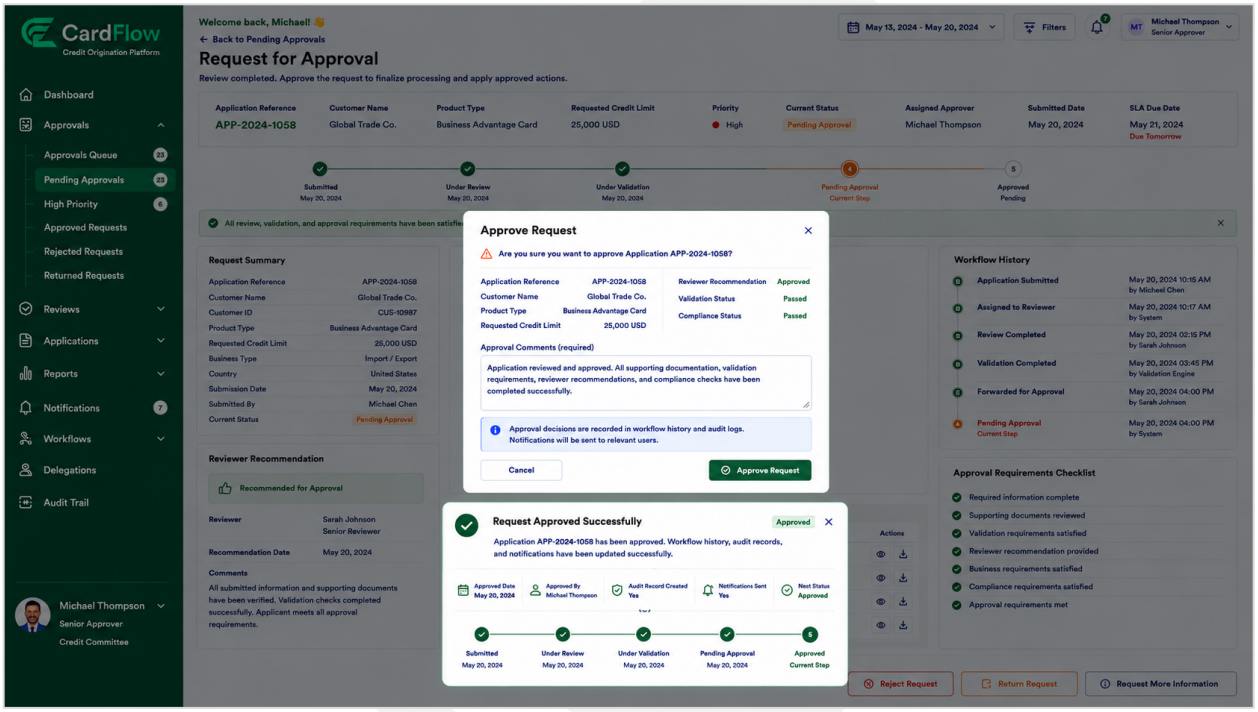

Figure 42 Approving Request

8.4.Rejecting Requests

Approvers can reject requests that do not satisfy approval requirements.

To reject a request:

1. Open the request.
2. Review the submitted information and supporting documents.
3. Click **Reject Request**.
4. Enter the reason for rejection.
5. Provide supporting comments.

6. Click **Submit Rejection Decision**.

When a request is rejected:

- The request status changes to Rejected.
- No further workflow processing occurs.
- Rejection comments are recorded in workflow history.
- Notifications are sent to relevant users.
- Audit records are generated.

Result: The request is rejected and the workflow is terminated.

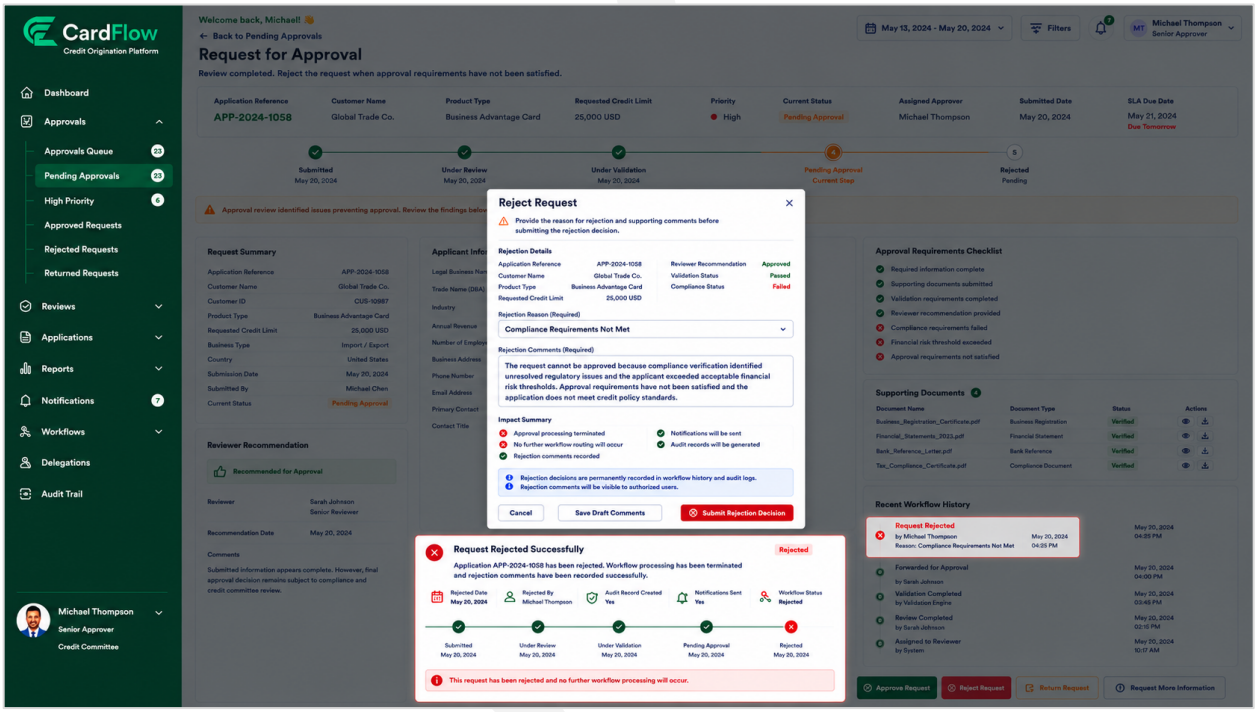

Figure 43 Rejecting Request

8.5.Returning Requests

Approvers can return requests when additional information, clarification, or corrections are required before a final decision can be made.

To return a request:

1. Open the request.
2. Review the submitted information and supporting documents.

3. Click **Return Request**.
4. Enter the reason for the return.
5. Specify the required corrections or additional information.
6. Click **Submit Return Decision**.

When a request is returned:

- The request status changes to Returned.
- Return comments become available to the requester.
- The requester can update and resubmit the request.
- Workflow history is updated.
- Audit records are generated.

Result: The request is returned for correction and may be resubmitted after updates are completed.

Figure 44 Returning Requests

9. Notifications

The **Notifications** module provides real-time updates regarding application activities, workflow progress, approval decisions, document requirements, and system-generated events. Notifications help users monitor application status changes, identify actions requiring attention, and stay informed of workflow activities without manually checking individual requests.

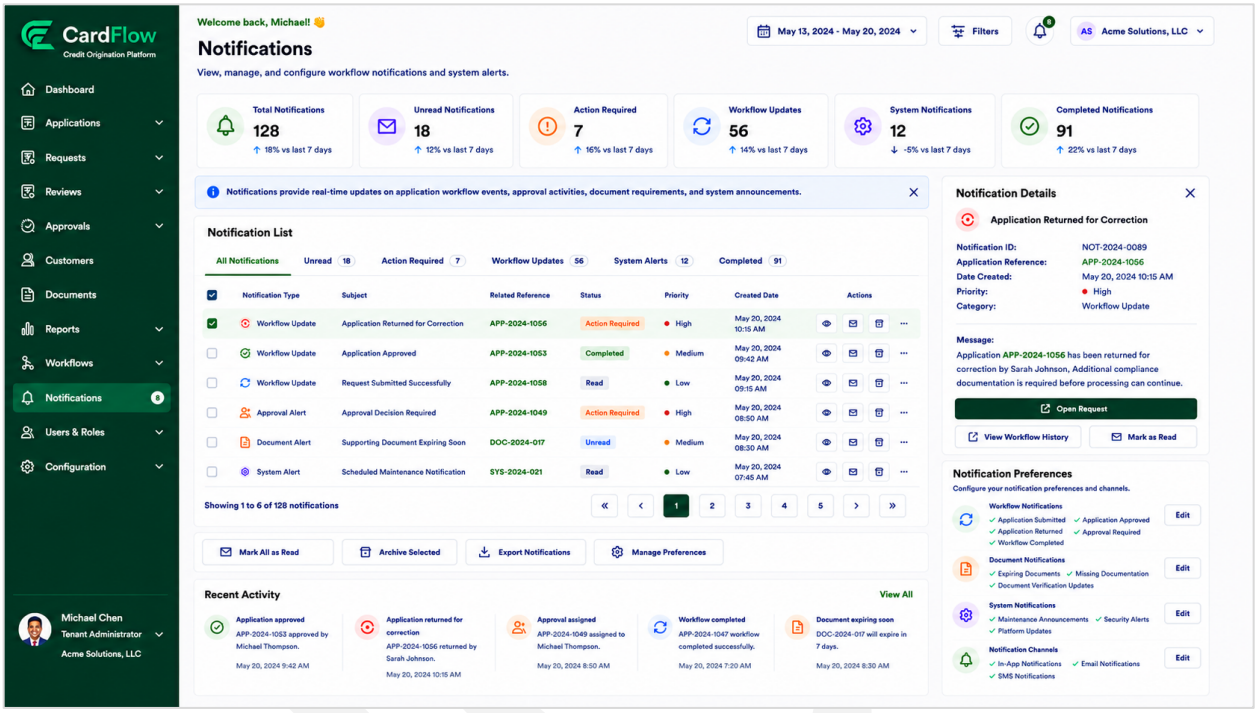

Figure 45 Notifications

Note:
The **Notification Center** accessible through the Notifications badge is different from the **Notifications** module:

- The **Notification Center** provides a condensed view of recent notifications and quick access to related records.
- The **Notifications** module provides a complete notification management workspace where users can view notification history, review notification details, manage notification preferences, and perform notification-related actions.

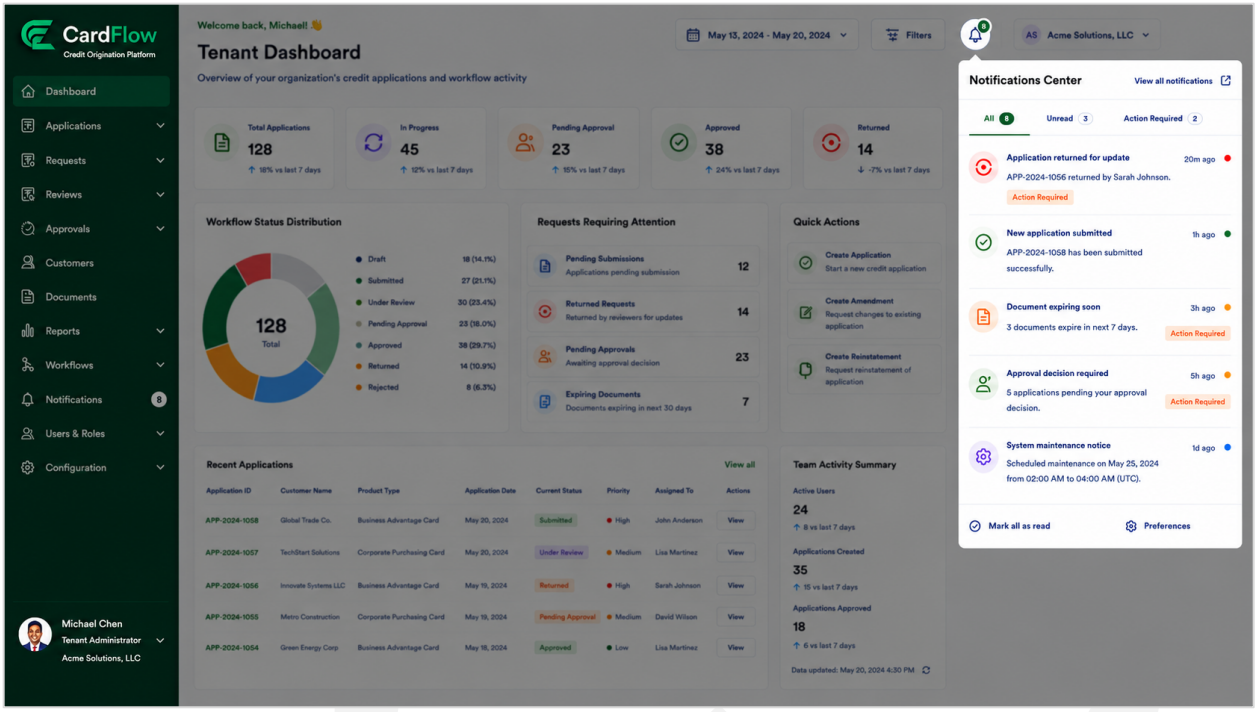

Figure 46 Notifications Center

Table 4 Notification Center VS Notifications Module

Feature	Notification Center	Notifications Module
Access Method	Notification icon in the application header	Notifications menu in the navigation panel
Purpose	Quick access to recent notifications	Full notification management
Notification Scope	Recent notifications only	Complete notification history
Actions Available	View notification, open related record, mark as read	Filter, search, manage, archive, configure preferences
Typical Usage	Quick review while working in another page	Dedicated notification monitoring and management

9.1.Viewing Notifications

Users can view notifications generated by workflow activities, approval actions, document events, and system processes.

To view notifications:

1. Navigate to **Notifications**.
2. Review the notification summary cards.
3. Select the appropriate notification tab.
4. Review notification details in the notification list.
5. Select a notification to view additional information.

The **Notifications** page includes:

- **Notification** summary cards
- **Notification List**
- **Notification Details** panel
- **Notification Preferences** panel
- **Recent Activity** section

Result: Notification details are displayed and users can identify workflow activities requiring attention.

9.2.Understanding Notification Types

CardFlow Credit Origination Platform generates different notification categories to inform users of workflow events and required actions.

Table 5 Notification Types

Notification Type	Description
Workflow Update	Generated when application status changes occur.
Approval Alert	Generated when approval actions are required.
Document Alert	Generated when document-related actions or updates occur.

Notification Type	Description
System Alert	Generated for platform announcements and maintenance events.

Notification statuses may include:

- **Unread**
- **Read**
- **Action Required**
- **Completed**

Result: Users can identify the purpose and urgency of each notification.

9.3.Reviewing Notification Details

Users can review detailed information associated with a notification.

To review notification details:

1. Open the **Notifications** page.
2. Select a notification from the **Notifications List** section.
3. Review the notification details displayed in the **Notification Details** panel.
4. Open the related request or workflow history if required.

The **Notification Details** panel may display:

- Notification ID
- Related application reference
- Notification category
- Priority
- Creation date
- Notification message
- Available actions

Result: Users can review notification information and access related workflow records.

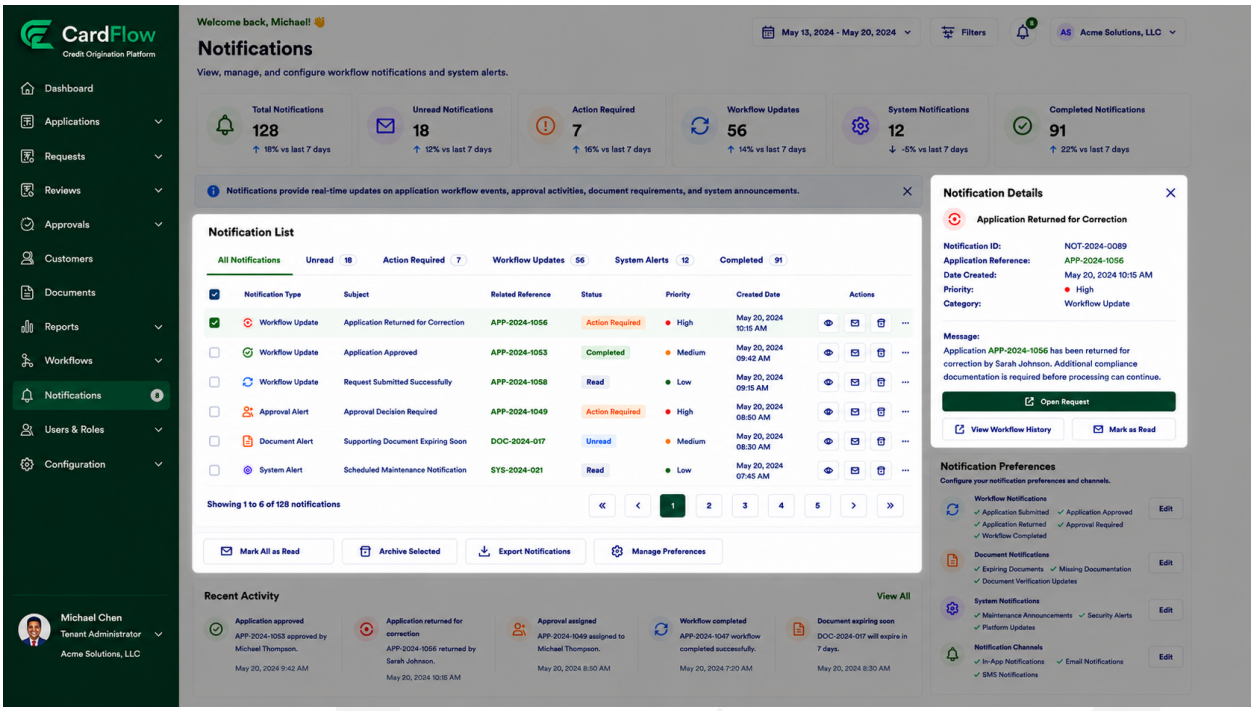

Figure 47 Reviewing Notification Details

9.4.Managing Notification Preferences

Users can configure how **CardFlow Credit Origination Platform** delivers notifications.

To manage notification preferences:

1. Navigate to **Notifications**.
2. Locate the **Notification Preferences** panel.
3. Select the notification categories to receive.
4. Configure preferred notification channels.
5. Save the updated preferences.

Available notification settings may include:

- Workflow Notifications
- Application Submitted
- Application Approved
- Application Returned
- Approval Required
- Workflow Completed
- Document Notifications
- Expiring Documents
- Missing Documentation
- Document Verification Updates

- System Notifications
- Maintenance Announcements
- Security Alerts
- Platform Updates
- Notification Channels
- In-App Notifications
- Email Notifications
- SMS Notification

Result: Notification delivery preferences are updated.

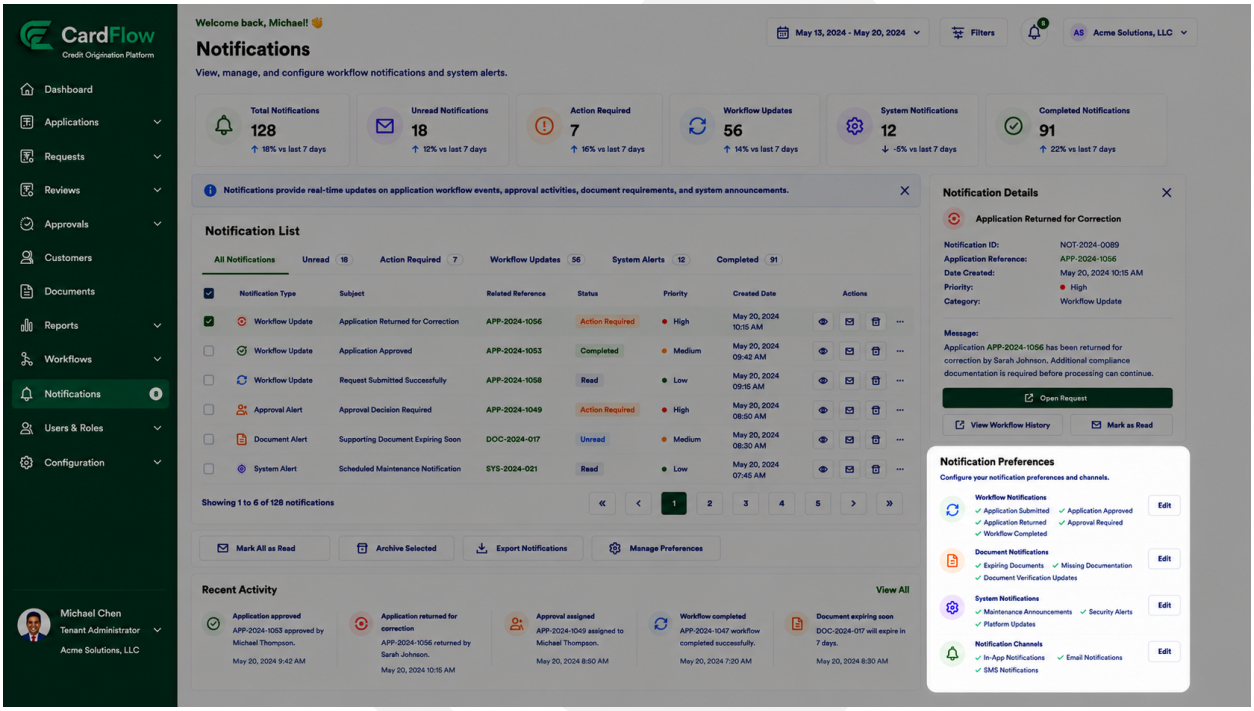

Figure 48 Managing Notification Preferences

9.5.Reviewing Recent Notification Activity

Users can review recent notification activity and previously generated notifications.

To review recent activity:

1. Navigate to **Notifications**.
2. Scroll to the **Recent Activity** section.
3. Review recent workflow and system events.
4. Open related records if additional information is required.

Result: Users can track recent notification activity and workflow events.

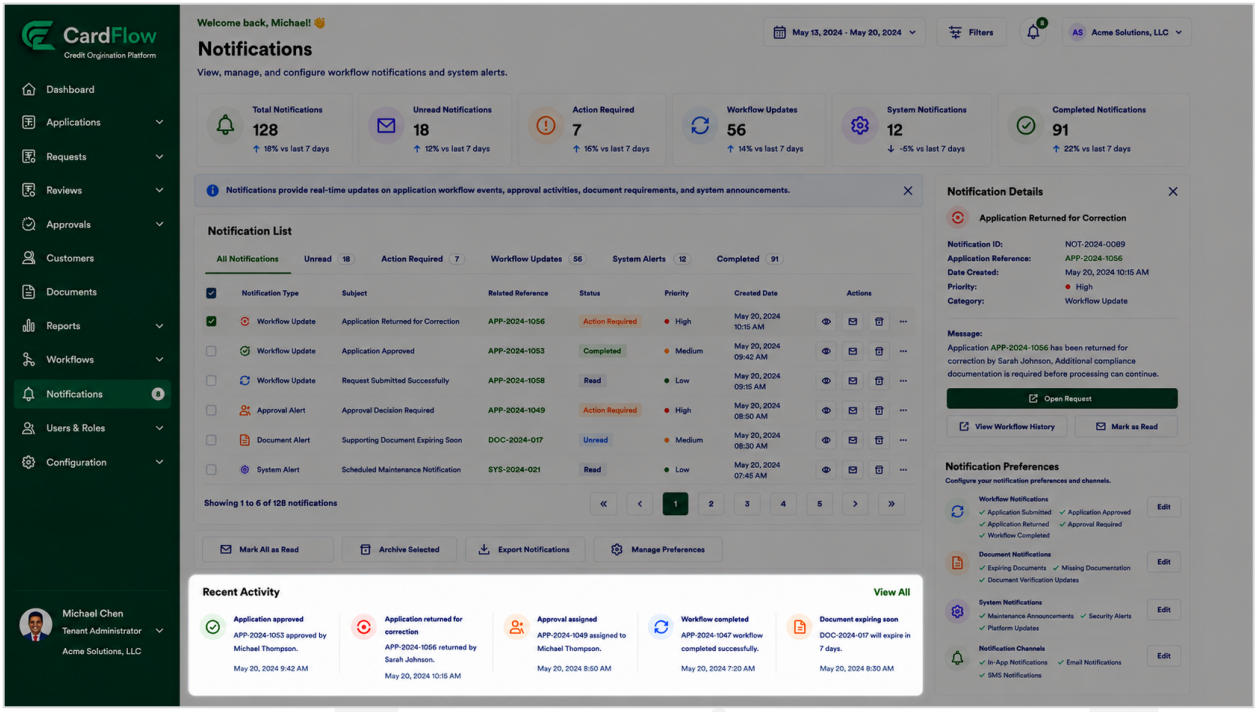

Figure 49 Reviewing Recent Notification Activity

10. Reports and Inquiry

The **Reports and Inquiry** module provides visibility into application status, workflow progress, approval activities, and historical processing records. Users can search for applications, monitor request progress, review workflow events, and export report data for operational or audit purposes.

10.1. Viewing Request Status

Users can view the status of submitted applications and requests throughout the workflow lifecycle.

To view request status:

1. Navigate to **Applications**.
2. Locate the required application.
3. Review the **Workflow Stage** section.
4. Open the application to view detailed workflow information.

The system may display statuses such as:

Table 6 Request Status

Status	Description
Draft	Application has not been submitted.
Submitted	Application has been submitted for processing.
Under Review	Request is being reviewed.
Under Validation	Validation checks are in progress.
Pending Approval	Awaiting approver decision.
Approved	Request has been approved.
Returned	Request requires updates or corrections.
Rejected	Request has been rejected.

Result: The user can determine the current processing stage and overall progress of the request.

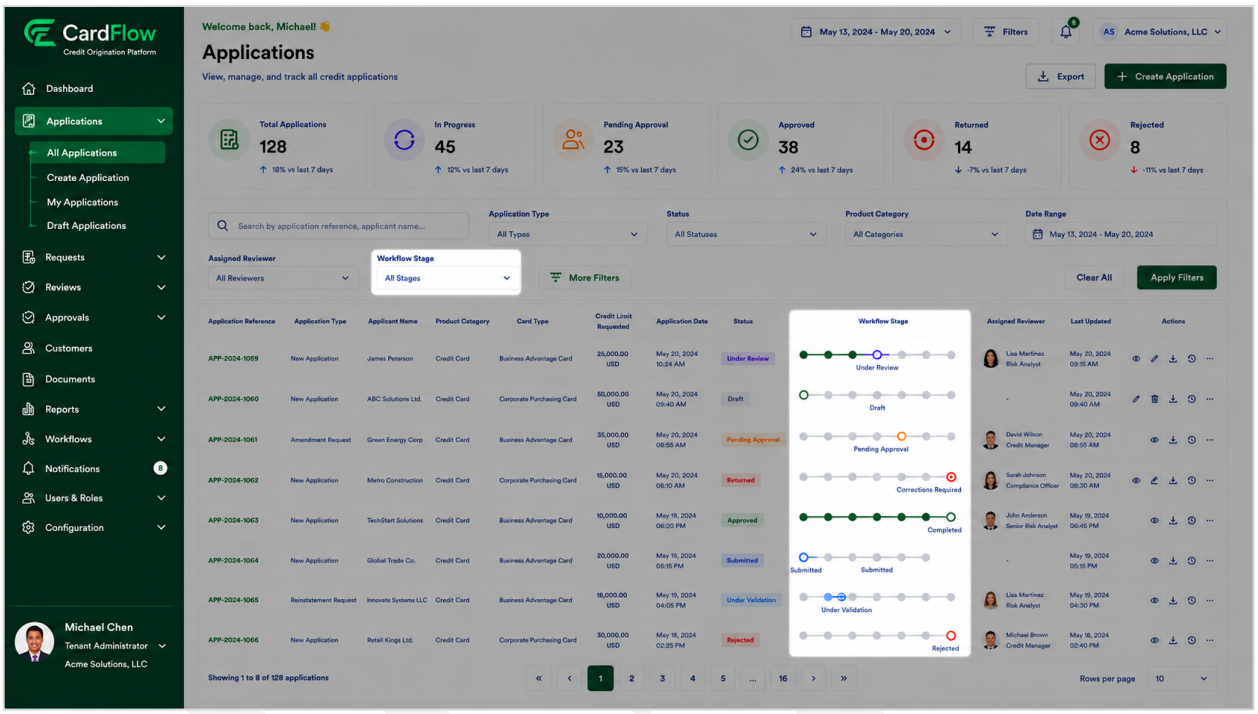

Figure 50 Viewing Request Status – Workflow Stage

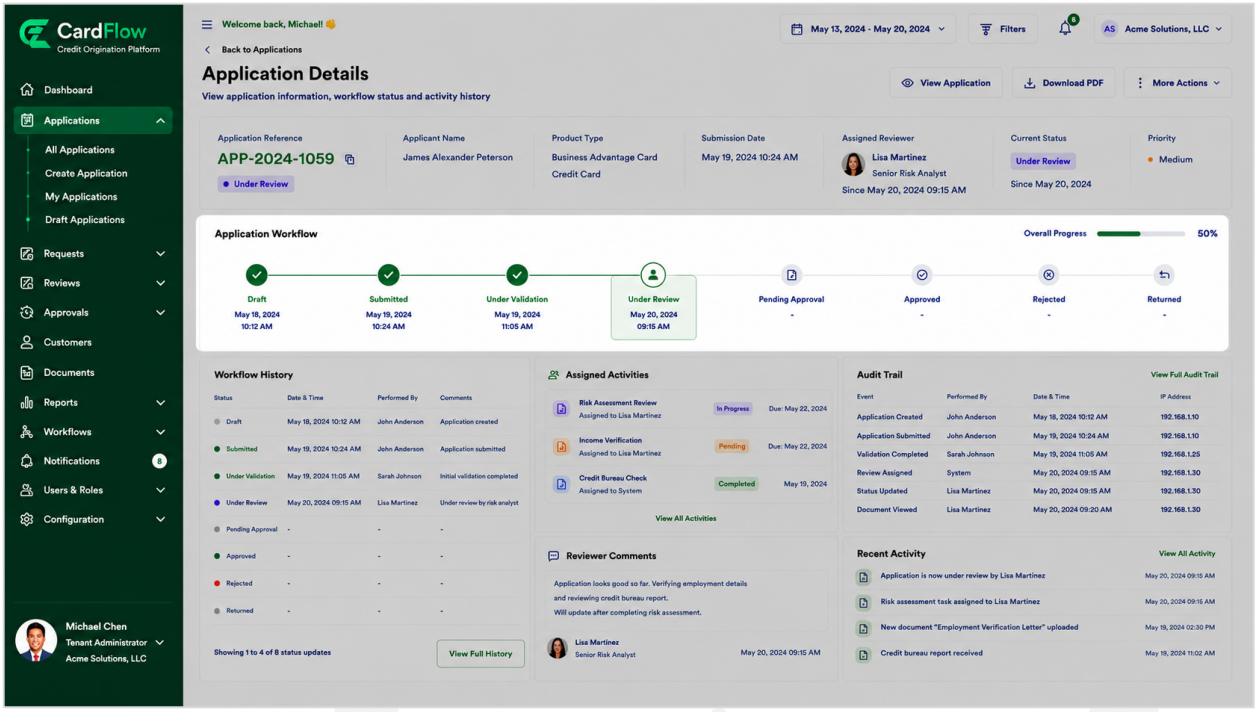

Figure 51 Viewing Request Status – Application Workflow

10.2. Searching Applications

Users can search for applications using available search and filtering options.

To search applications:

1. Navigate to **Applications**.
2. Use the **Search** field to enter an application reference number, customer name, or other search criteria.
3. Apply available filters as required.
4. Review the matching search results.

Common search criteria include:

- **Application Reference**
- **Customer Name**
- **Product Type**
- **Status**
- **Priority**

- **Submission Date**
- **Assigned User**

Note: Users may combine multiple filters to narrow results.

Result: Matching applications are displayed based on the specified search criteria.

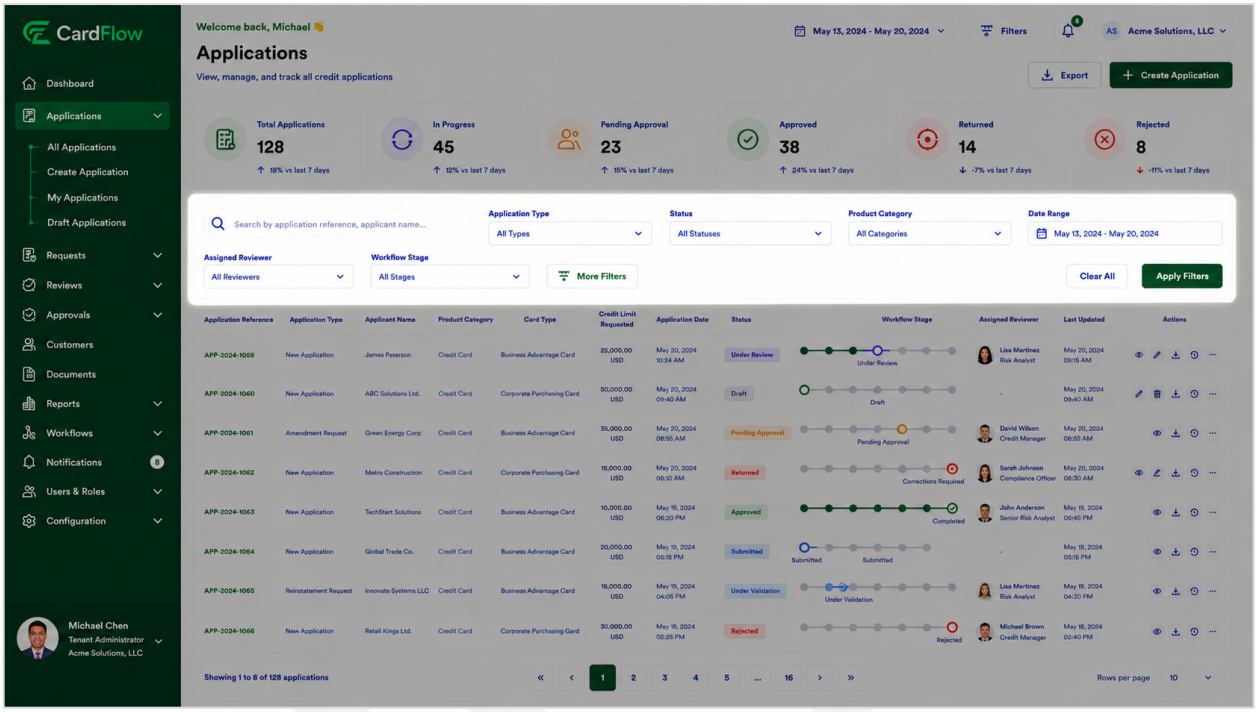

Figure 52 Searching Applications

10.3. Viewing Workflow History

Users can review workflow activities associated with an application to understand how the request has progressed through the approval process.

To view workflow history:

1. Open the required application.
2. Navigate to the **Workflow History** section.
3. Review the recorded workflow events.

Workflow history may include:

- Application submission
- Reviewer assignments
- Validation activities
- Approval decisions

- Returned requests
- Rejections
- Resubmissions
- Workflow completion events
- Each entry typically displays:
- Activity Date and Time
- User
- Action Performed
- Status Change
- Comments (if applicable)

Result: The user can view a complete chronological record of workflow activities associated with the request.

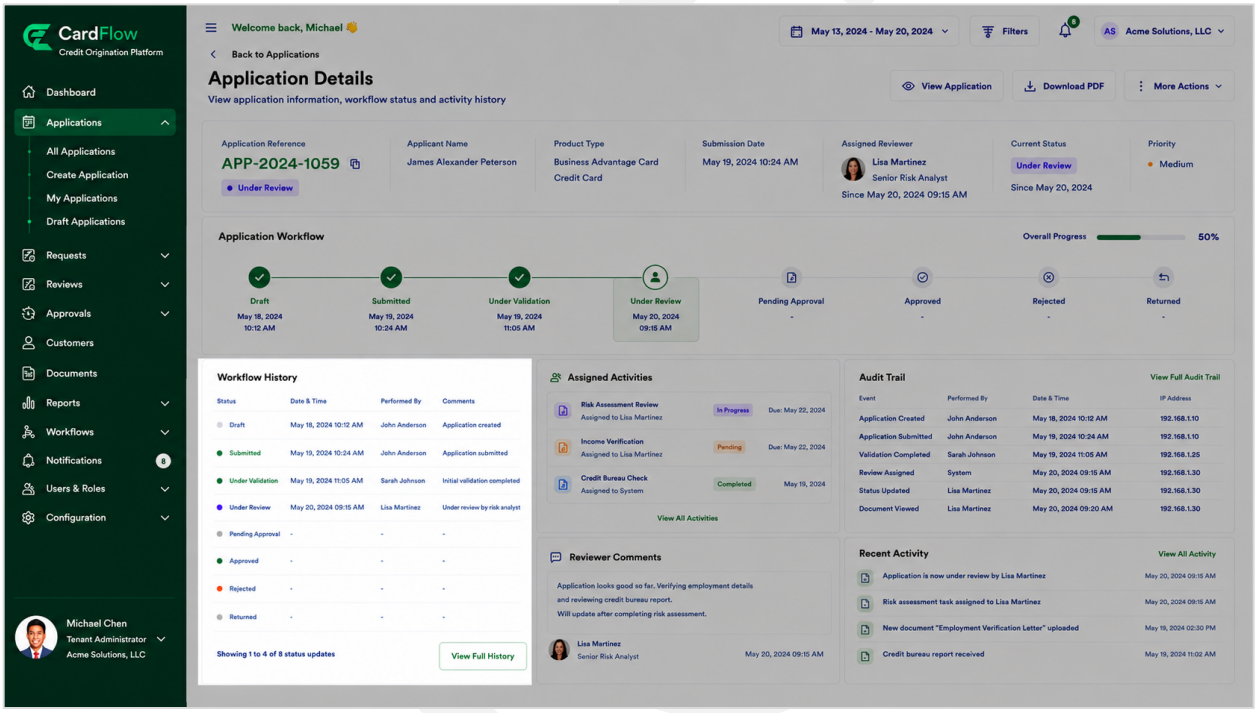

Figure 53 Viewing Workflow History

10.4. Viewing Audit Trail

The **Audit Trail** feature provides a detailed record of system activities performed against an application or request.

To view audit history:

1. Open the required application.
2. Navigate to the **Audit Trail** section.
3. Review recorded audit events.

Note:

Audit records are maintained for compliance, security, and traceability purposes.

Result: The user can review historical changes and actions performed against the application.

Audit records may include:

- Record creation
- Data modifications
- Status updates
- Workflow actions
- Approval decisions
- Document uploads
- User access activities

Each audit record typically includes:

Table 7 Audit Trail Fields

Field	Description
Event	Description of the action
Performed By	User who performed the action
Date/Time	Timestamp of the activity
IP Address	IP address associated with the user that performed the recorded action.

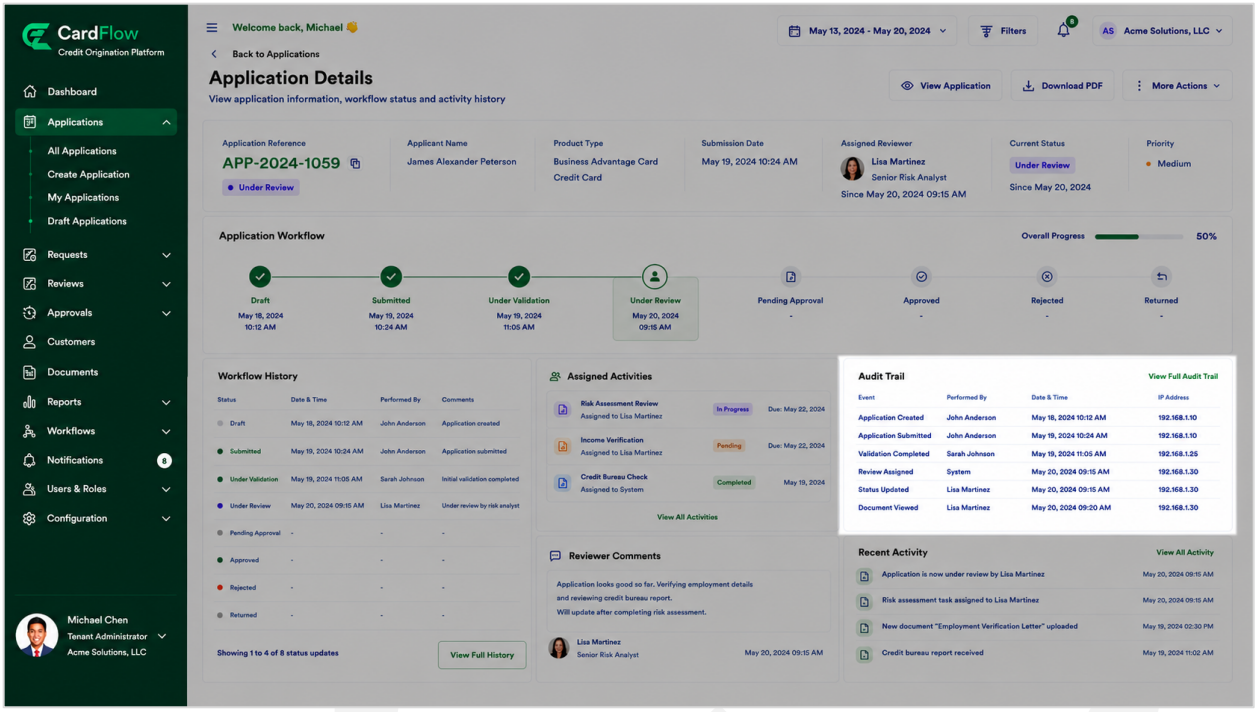

Figure 54 Viewing Audit Trail

10.5. Exporting Reports

Users can export application and workflow information for reporting, operational review, or audit purposes.

To export report data:

1. Navigate to **Reports**.
2. Apply search criteria or filters as required.
3. Click **Export**.
4. Select the preferred export format.
5. Download the generated report.

Depending on user permissions, available export formats may include:

- Excel (.xlsx)
- CSV (.csv)
- PDF (.pdf)

Common report types include:

- Application Status Reports
- Approval Activity Reports
- Workflow Performance Reports
- Returned Requests Reports
- Audit Activity Reports

Result: The selected report is generated and downloaded in the chosen format.

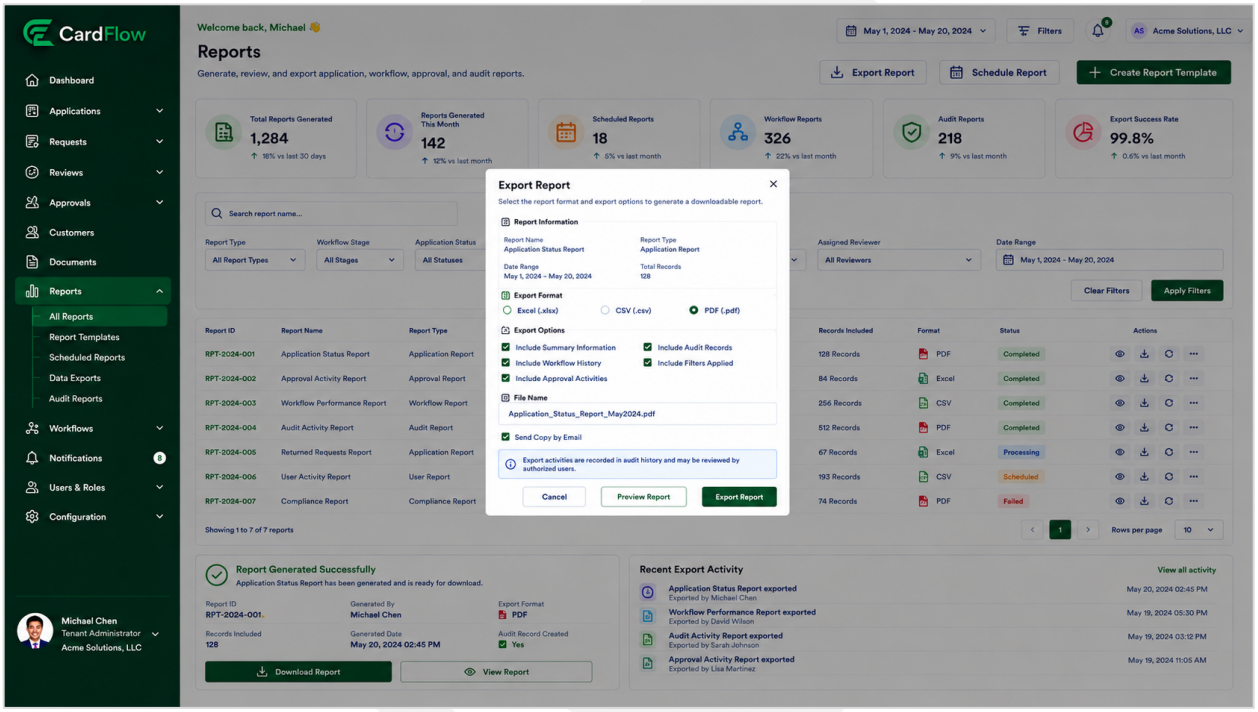

Figure 55 Exporting Reports

11. Troubleshooting

This section provides guidance for resolving common issues that may occur while submitting, reviewing, approving, or managing applications in **CardFlow Credit Origination Platform**. If an issue cannot be resolved using the information provided below, contact your system administrator or support team for assistance.

11.1. Common Validation Errors

Validation errors occur when required information is missing, incomplete, or does not meet configured business rules.

11.1.1. Required Information Missing

The system displays a validation message indicating that mandatory fields have not been completed.

Table 8 Required Information Missing

Possible Cause	One or more required fields contain no value.
Resolution	1. Review all highlighted fields. 2. Enter the required information. 3. Save or resubmit the request.

11.1.2. Invalid Data Format

The system rejects the entered value.

Table 9 Invalid Data Format

Possible Cause	The value does not match the expected format. Examples: • Invalid email address • Invalid phone number • Unsupported date format • Invalid identification number

Resolution	1. Verify the entered value. 2. Correct the format. 3. Save or resubmit the request.

11.1.3. Business Rule Validation Failure

The application cannot proceed to the next workflow stage.

Table 10 Business Rule Validation Failure

Possible Cause	One or more configured business rules have not been satisfied. Examples: • Required supporting documents not uploaded • Eligibility criteria not met • Mandatory review activities incomplete
Resolution	1. Review validation messages displayed by the system. 2. Complete the missing requirements. 3. Resubmit the application.

11.1.4. Upload Failures

The selected file cannot be uploaded. Document upload issues may prevent applications from being submitted or processed.

Table 11 Upload Failures

Possible Cause	• Unsupported file type • File exceeds maximum size limit • Network interruption during upload
Resolution	1. Verify that the file type is supported. 2. Confirm the file size complies with organizational requirements. 3. Retry the upload. 4. Refresh the page if necessary.

11.1.5. Uploaded File Not Visible

The uploaded document does not appear in the application.

Table 12 Uploaded File Not Visible

Possible Cause	• Upload process did not complete successfully • Browser session expired
Resolution	1. Refresh the page. 2. Verify that the document appears in the Supporting Documents section. 3. Re-upload the document if required.

11.1.6. Duplicate Document Upload

The system prevents uploading a document that already exists.

Resolution

1. Review existing uploaded documents.
2. Replace the existing file only if an updated version is required.

11.1.7. Returned Requests

Applications may be returned when additional information, clarification, or document updates are required.

Table 13 Returned Requests

Possible Cause	A reviewer or approver identified missing information or documentation.
Resolution	1. Open the returned application. 2. Review the return comments. 3. Complete the requested updates. 4. Upload any required supporting documents. 5. Resubmit the application.

11.1.8. Unable to Resubmit Returned Request

The application cannot be resubmitted.

Table 14 Unable to Resubmit Returned Request

Possible Cause	• Required corrections have not been completed • Mandatory fields remain incomplete • Required documents are missing
Resolution	1. Review all validation messages. 2. Complete outstanding requirements. 3. Attempt resubmission again.

11.1.9. Access Issues

The system displays an access denied message. Access-related issues may occur when users do not have sufficient permissions or when authentication problems exist.

Table 15 Access Issues

Possible Cause	The user does not have permission to access the requested function or application.
Resolution	1. Verify that you are assigned the appropriate role. 2. Contact your administrator if additional permissions are required.

11.1.10. Application Not Visible

An expected application does not appear in search results.

Table 16 Application Not Visible

Possible Cause	• Application belongs to another tenant • User lacks access permissions • Search criteria are filtering results

Resolution	1. Verify search filters. 2. Confirm application ownership and access permissions. 3. Contact an administrator if necessary.

11.1.11. Session Expired

The system redirects the user to the login page.

Table 17 Session Expired

Possible Cause	The user session timed out due to inactivity.
Resolution	1. Log in again. 2. Navigate back to the required page. 3. Save work regularly to prevent data loss.

12. Frequently Asked Questions

This section addresses common questions related to the use of **CardFlow Credit Origination Platform**.

- **How can I check the status of my application?**

  Navigate to Applications or Requests and review the Current Status column. You may also open the application to view detailed workflow progress.

- **What does the Returned status mean?**

  Returned indicates that additional information, supporting documentation, or corrections are required before processing can continue.

- **Can I modify an application after submission?**

  Submitted applications generally cannot be edited unless they are returned for correction or an authorized amendment process is initiated.

- **How can I view workflow history?**

  Open the application and review the Workflow History section to view status changes, user actions, and processing milestones.

- **Can I download application information?**

  Yes. Authorized users may export application, workflow, approval, and audit information using the Reports module.

- **Why am I unable to approve a request?**

  Possible reasons include:

  - Required validations are incomplete
  - Supporting documents are missing
  - Approval prerequisites have not been satisfied
  - You do not have approval permissions
  - Review the approval requirements checklist for additional details.

- **Who can view audit history?**

  Audit history is typically available only to authorized users such as reviewers, approvers, administrators, auditors, or compliance personnel, depending on assigned permissions.

- **How do I change my notification preferences?**

Navigate to Notifications and update the notification channels and event types that you wish to receive.
